MEMORANDUM

Subject: Recognition of correct waterbody segment identification for NPDES permit/TMDL (City of Quincy Industrial Wastewater Treatment Facility)

From: Fletcher G. Shives *Fletcher G. Shives*

To: File

The subject NPDES permit/TMDL was submitted as the TMDL for WBID WA-41-9280 (Potholes Reservoir) although the waterbody name was given as Irrigation Drain DW237 and W645. The permit should have identified WA-41-4500 as the correct waterbody identification number for the irrigation drains (West Canal to Frenchman Waterway). The TMDL water quality modeling was plainly for the irrigation drains and not Potholes Reservoir. Only the identifier was stated incorrectly on the submittal package. The approval letter repeated the submitted identifier for consistency. This memorandum to file is intended to clarify and confirm that the TMDL is for the irrigation drains and not for Potholes Reservoir.
