

Water Resources Program Request for a Conforming Document

For Ecology Use
(Date Stamp)

Chapter 90.03 RCW was revised by Second Engrossed Second Substitute House Bill (2E2SHB) 1338 which became effective on September 9, 2003. Changes to the water code mean that for public water systems that are in compliance with the terms of a water system plan that has been approved by the Washington State Department of Health (DOH), the place of use of the municipal supply water right includes the place of use on the water right and the service area approved by DOH. This is done as a matter of law and thus, a water right application is not necessary.

RCW 90.03.015 defines municipal water supply as a beneficial use of water meeting one of several criteria, including for fifteen or more residential connections, or providing residential use of water for a non-residential population that is on average, at least 25 people for at least 60 days a year.

RCW 90.03.560 states that when requested by a municipal water supplier, the department shall amend the water right documents and related records to ensure that water rights that are for municipal water supply purposes, as defined in RCW 90.03.015, are correctly identified as being for municipal water supply purposes.
