What is the Law?

The law states that even where burning is permitted, everyone should try to reduce burning to the greatest extent possible.

Why?

Even unprocessed natural vegetation such as lawn clippings, leaves and pine needles produce air pollutants when burned. This includes carbon monoxide and fine particulates which, when inhaled into the lungs, can have serious health impacts.

Children, the elderly and those suffering from chronic respiratory conditions such as asthma, emphysema and bronchitis are the most vulnerable to poor air quality. Reducing air pollution is one way Ecology is working to decrease toxics in the environment.
What can I burn?

- In many areas, no residential burning is allowed. However, in some rural areas, you can burn yard and garden debris such as leaves and clippings. Piles must be no larger than 4 feet wide by 3 feet high and must be at least fifty feet away from structures. Piles larger than this require a burn permit.
- Recreational fires such as campfires and barbeques. Only burn briquettes, propane, and bare, untreated, dry firewood.
- Debris from land you own. This includes land clearing burning and pasture management, and you must have a permit to burn.

What can’t I burn?

- Residential and land clearing burning are banned in: Cusick, Ione, Metaline, Metaline Falls, Newport, Usk, Colville, Chewelah, Kettle Falls, Marcus, Addy, Clayton, Hunters, Lake Spokane, Valley, Northport, Springfield, and Republic and their surrounding Urban Growth Areas*.
- You may not dispose of yard debris in a recreational fire.
- Burning ANYTHING in a burn barrel, including natural vegetation, is illegal. This is because a barrel limits the amount of oxygen that can get to a fire, which results in incomplete combustion and lots of smoke.
- It is illegal to do agricultural burning or land clearing burning without a permit.

When can I burn?

You can burn year-round, excluding times when a burn ban has been issued by either Ecology or your local fire department. You must always notify your local fire department when you are planning on burning, but you can also call the Agricultural Burn Hotline to find out if it is a good day to burn in your area.

What happens if I burn when I’m not supposed to?

You can be fined up to $10,000 per day, per violation! Illegal outdoor burning is one of the most common air quality violations. It pays to know the rules before you burn!

Who can I call for help?

Washington Agricultural Burn Hotline
1-800-406-5322
Washington State Department of Natural Resources (DNR)
1-800-527-3305
Ferry County Solid Waste
(509) 775-5217
Stevens County Public Works
(509) 738-6106
Pend Oreille County Public Works
(509) 447-4513

Contact your local fire department before starting any outdoor fire.

*The Urban Growth Areas include the city limits and an area around each city. For more information about Urban Growth Areas, consult your local planning department.
