## Tips for transport

- Keep products away from children and pets and out of the passenger compartment of your vehicle. If you are transporting HHW in a truck, secure the load with ties to prevent the load from shifting.
- Keep products in their original containers. If you have used something different, label it.
- Make sure items are well sealed, lids tight, not leaking. Keep broken or leaking containers separate from other items.
- Place items in leak-proof tubs packed with newspaper. Put leaking containers into another tub or "Ziploc" type bag.
- Wrap fluorescent bulbs or tubes in newspaper to prevent breakage. Keep fluorescent bulbs or tubes separate from rest of load.
- Do not bring large containers (over 5 gallons) or large loads (over 50 gallons) without calling first.
- Empty paint cans and other containers may go in your regular trash. Remove lids.
