

Multi-family Outreach Materials

Recycling Bags: These large bags are easy to store, collect materials, carry to recycling container and clean. Bags can be distributed door-to-door or during rent payments and lease renewals. Enough available for each resident plus extras for new move-ins.

Recycling Flyers: Flyers are printed in full color with helpful graphics. Standard flyer comes with English on one-side and Spanish on reverse, but are available in multiple languages. Great for inserting annually in newsletters or distributing along with tote bags.

Custom Letters for Residents: Letters can be customized to your residents' needs – whether you are starting a recycling program or just reminding residents about it. Printed on your letterhead.

Recycling Container Lids & Locks: Worried about contamination in your recycling? Well, fear no more! 3-yard recycling containers come with an optional slotted recycling lid with lock bar and sturdy combination lock. These containers have proven successful in a number of complexes where residents previously placed garbage in the recycling containers. The combination lock (2-7-7-1) can easily be opened by maintenance and drivers, but keeps residents from lifting the lid to insert garbage. No additional cost to complex.

Recycling Presentations & Events: City of Federal Way's Recycling Project Manager can come to your complex to meet with your residents to help spread the word about recycling. You can either schedule a special event or coordinate with current complex event (summer BBQ, resident appreciation day, etc). Games for the children and giveaways for residents of all ages.
