Recycle used mercury-switch thermostats

If you're a heating, ventilation and air-conditioning (HVAC) or other contractor, there's good news for you: Now you can easily recycle every mercury-switch thermostat you remove.

- 1 It's free**
There's no charge to you.
- 2 It's easy**
 - **Store** used mercury-switch thermostats safely in your service trucks or at the shop.
 - **Bring** the used thermostats—any brand—the next time you visit your participating wholesaler or other collection site.
 - **Put** the used thermostats in the green recycling bin or give them to the counterperson.
- 3 It's good for the environment**
Recycling is the right thing to do. By recycling used mercury-switch thermostats, you help ensure a cleaner environment for all of us.

Visit www.thermostat-recycling.org

FRONT COVER

Q&A

► What is the purpose of the program?

The goal is to recycle all mercury-containing thermostats that a contractor removes.

► What should I do?

Whenever you replace a mercury-switch thermostat, keep the old one. Put it in a secondary container when possible to avoid damage or potentially breaking the ampoule and releasing the mercury. When you visit a participating wholesaler or collection site, put the used thermostats in the green bin provided by the Thermostat Recycling Corporation (TRC).

► Which wholesalers participate?

You'll find the recycling bins at many locations in Snohomish County and surrounding areas (see list). If your HVAC wholesaler isn't participating, ask them to start now. (It's easy and free for them after a one-time \$25 fee per collection container.)

INSIDE FRONT COVER

INSIDE

► What thermostats can I recycle?

All brands of wall-mounted, mercury-switch thermostats or sensors.

► Should I take out the mercury switch?

No. Return the entire thermostat—intact, including the cover. The thermostat casing protects the mercury switch during shipment.

► What's not accepted under this program?

- Loose mercury switches (bulbs)
- Leaking mercury-switch thermostats
- Electronic thermostats and other thermostats without mercury switches
- Batteries, fluorescent light bulbs and other devices containing mercury

Contact Snohomish County's household hazardous waste management office for proper disposal methods of these items (425-388-6050).

► What happens after I drop off the old thermostats?

When the bin is full, the collection site sends it to TRC's recycling center. The switches are removed and forwarded to a mercury recycler.

► Is there a "reward" for the used thermostats I bring in?

No. The recycling program is provided as a service to the HVAC industry.

► Do I have to participate in the program?

No. Participation in the TRC program is voluntary. Keep in mind, however, that mercury-switch thermostats are banned from regular garbage in Snohomish County and must be recycled to prevent release of mercury to the environment. TRC provides an easy recycling option.

INSIDE BACK COVER

► What about in-warranty thermostats?

If a thermostat fails during its warranty period, follow your normal warranty return procedures. If you recycle in-warranty thermostats, you won't receive warranty credit or replacement.

► What else should I know?

Bring in old thermostats promptly. Don't transport more than 100 thermostats at a time or keep them for more than 10 days.

► What if a homeowner brings me a thermostat that he or she removed?

Please accept it and recycle it with your other old thermostats.

The mercury thermostat recycling program is a service provided by the Thermostat Recycling Corporation (TRC), a non-profit corporation funded by thermostat manufacturers. The program is offered in coordination with state environmental officials.
