DeVries is purchasing water rights under G4-26237C from the landowners subject to contingencies to be satisfied, including approval for transfer of the rights for use by DeVries. The landowners may retain portions of the transferable water right, to be determined during the change process. For this reason the application requests adding the DeVries well site and place of use. At the conclusion of the transfer, the appropriate administrative process will be used to separate the DeVries portion from any portion retained by the landowners. The landowners also own a separate certificate No. G4-23208C which applies to their property and is planned to be retained by them.
