6. Remarks and Other Relevant Information:

LSID's existing Columbia River diversion is located 1400ft west and 1000ft north of the SW corner of Sec 19. Change is requested to offset water shortages due to declared drought conditions within the Stemilt Creek Basin. Requested quantities are for the purposes of supporting currently cultivated areas located within LSID. Due to drought conditions, available water supplies from Stemilt Creek are less than 75% of normal which will result in hardship and loss to existing agricultural operations. Water right authority shall be accomodated via water rights which are owned by the applicant and authorized for irrigation, in-stream flows, and mitigation associated with a pending water right application previously submitted by LSID and currently under review by DOE.

IF FOR SEASONAL OR TEMPORARY, START DATE ___/___/___ END DATE ___/___/___

Certain applications may incur a Real Estate Excise Tax liability for the seller of the water rights. The Department of Revenue has requested notification of potential taxable water right related actions and therefore may be provided with a copy of this request. For further information, contact:
