YES  NO – IF YES, PROVIDE THE WATER RIGHT/CLAIM NUMBER(S): Claim No. 01478 -- unnamed spring; Kittitas Reclamation District water

## 6. Remarks and Other Relevant Information:

Manastash Creek historically provided critical spawning, rearing, and migratory habitat for resident and anadromous salmonids in Upper Yakima Basin. Flows in Manastash Creek are highly dependent on mid-elevation snowpack and peak in spring and early summer. Manastash Creek junior water rights holders are often regulated as early as May to ensure sufficient flows for all senior water rights (irrigation and trust water). Historically, the amount of water available was only sufficient to meet senior water rights and resulted in a dewatered reach of approximately 3.25 miles from the historic Reed Diversion to the Barnes Road crossing. At Barnes Road, irrigation return flows provided water in the stream again. Dewatering occurred from June to November in normal water years but could occur earlier in drought years. Transfer of this water right to instream flow will increase the amount of Trust Water available for instream flows within Manastash Creek. At this time, 18.1 cfs are designated Trust Water rights for instream flow in Manastash Creek. An additional 3.5 cfs is supplied for instream flow by Kittitas Reclamation District and the U.S. Bureau of Reclamation

This change application seeks to transfer the water right for exclusive use as instream flows for fish maintenance and enhancement, recreational uses, and preservation of environmental and aesthetic values as allowed under RCW Chapters 90.03, 90.42 and 90.58. Since this transfer is for a non-consumptive purpose and would provide a substantial benefit to the natural environment, we request expedited processing under WAC 173-152-050(2)(c).

The water right in this application was previously evaluated for extent and validity and reported valid to its full extent in Report of Examination file no. CS4-01478CTCL@3
