6. Remarks and Other Relevant Information:

Application is being submitted to complete the change process initiated in July of 2014 with the installation and development of groundwater well(s) to determine viability of conversion from surface to groundwater. Two wells were installed and developed by MSRF and are found to provide adequate water for continued irrigation of the Reynaud Ranch properties. Applicants wish to finalize the change process in anticipation of abandonment of the surface water diversion points.

MSRF is working with the landowner and the Natural Resource Conservation Services to complete this project as a voluntary action to increase stream flow in the Twisp River. The project has received funding support through WA RCO, BPA and NRCS to implement actions prioritized in a reach-based enhancement project in support of salmon recovery.
