Do you own all the lands on which the proposed place of use is located? YES NO

If no, do you have legal authority to make this application for use of another's land? YES NO

Provide owner name(s), address, and phone number: _____

Are there any other water rights or claims associated with this property or water system? YES NO

If yes, provide the water right and/or claim numbers: CS4-ADJ47P36 is a retired stock water right that was associated with this property. G4-35084 (Lost Creek) is an irrigation right located on a property upstream of the Myers Creek parcels. Crown already has agreements to augment Myers Creek with the Lost Creek right if flow in Myers Creek drops below 1cfs. The water Crown proposes to use to water trees on Myers Creek would mean that irrigation water may have to be directed to Myers Creek for a longer period of time. This would just mean less irrigation.

Attach a map of your project showing the point of diversion/withdrawal and place of use. If platted property, be sure to include a complete copy of the plat map.

Section 5. WATER SYSTEM DESCRIPTION

Describe your proposed water system (include type and size of devices used to divert or withdraw water from source): A portable water pump will be used to pump water from Myers Creek to water tree seedlings on the banks adjacent to the stream. The water will be moved dispersed by hoses. The intake will be covered by a screen to avoid damage to aquatic life. The operator will ensure that no erosion damage results from the water on land, and that no water washes sediment from the surface into the stream.
