7. Remarks and Other Relevant Information:

This Change Application seeks to effectuate a partial transfer of the water right to be used exclusively for instream flows for fish maintenance and enhancement, recreational uses and preservation of environmental and aesthetic values as allowed under RCW Chapters 90.03, 90.42 and 90.58. The goals and environmental benefits of the project will prevent ESA listed salmonids from being diverted into an out-of stream irrigation system and eliminate impacts due to the annual maintenance of an instream push-up dam. Additionally, new wells will be metered allowing irrigators to gauge use. The irrigation systems lie within the Lower Entiat River Assessment Unit (RM 0.0-16.2) of the Entiat subbasin. The ESA listed salmonids that utilize the mainstem Entiat River within the Lower AU and project portion of the subbasin include endangered Upper Columbia River spring Chinook (*Oncorhynchus tshawytscha*), as well as endangered steelhead (*Oncorhynchus mykiss*) and threatened bull trout (*Salvelinus confluentus*). Non-listed salmonids such as summer Chinook and Coho, and resident fish species such as westslope cutthroat trout are also found here. This project addresses limiting factors and implements actions recommended in the Entiat WRIA 46 Watershed Management Plan approved in 2004, the Entiat Subbasin Plan, and draft Upper Columbia Salmon Recovery Plan. Therefore, we request expedited processing under WAC 173-152-050(2)(b) and (3)(a).

Certain applications may incur a Real Estate Excise Tax liability for the seller of the water rights. The Department of Revenue has requested notification of potential taxable water right related actions and therefore may be provided with a copy of this request.
