RE: Application G4-34512

I have to apologize for the confusion. I assumed that since we were sharing the well With Terry Mohar and he had reported the water usage that would suffice. His permit number is G4-32967. The meter reading he reported is as follows:

September 15 <sup>th</sup>	23.000
October 1 <sup>st</sup>	30.567
October 15 <sup>th</sup>	37.016
November 1 <sup>st</sup>	42.0294

Due to the late start up of the well because of the unavailability of a generator we required to run said pump, we were unable to start pumping until September. Our crops suffered somewhat but luckily it was a cool summer.

Our share of the usage was about 50% of the water reported by Mr. Mohar. If you have any further questions please contact me at 509-882-3371

Sincerely,

  
Mark Tudor

**RE: Application No(s). G4-34512**

Earlier this year, the Department of Ecology issued an Emergency Drought Authorization under the above-referenced application number for the use of emergency wells in the Yakima River basins to supplement reduced deliveries during this irrigation season. In some cases new wells were approved for this purpose.

One of the provisions of the authorizations was that a flow meter must be installed, water use monitored, and the water use records submitted to the department at the end of the irrigation season. At this time, I am writing to request the metering reports on these wells. If you did not drill a well that was authorized, or did not use water that was authorized, please let us know.

My staff will be conducting end of irrigation season field visits in the near future. Your meter records and information on the completion of new wells is greatly appreciated.

If you have questions, please call Suzanne Blakeney at (509) 454-7294.

Sincerely,

Phil Crane, Unit Supervisor  
Water Resources Program
