

STATE OF WASHINGTON
DEPARTMENT OF ECOLOGY

PERMIT
TO APPROPRIATE PUBLIC WATERS OF THE STATE OF WASHINGTON

- Surface Water (Issued in accordance with the provisions of Chapter 117, Laws of Washington for 1917, and amendments thereto, and the rules and regulations of the Department of Ecology.)
- Ground Water (Issued in accordance with the provisions of Chapter 263, Laws of Washington for 1945, and amendments thereto, and the rules and regulations of the Department of Ecology.)

PRIORITY DATE	APPLICATION NUMBER	PERMIT NUMBER	CERTIFICATE NUMBER
October 4, 2011	G4-35526	G4-35526P	

NAME Monty and Phyllis Moore			
ADDRESS (STREET)	CITY	STATE)	ZIP CODE)
PO Box 447	Snohomish	WA	98291

The applicant is hereby granted a permit to appropriate the following public waters of the State of Washington, subject to existing rights and to the limitations and provisions set out herein.

PUBLIC WATERS TO BE APPROPRIATED

SOURCE Well		
TRIBUTARY OF (IF SURFACE WATERS)		
MAXIMUM CUBIC FEET PER SECOND	MAXIMUM GALLONS PER MINUTE	MAXIMUM ACRE -FEET PER YEAR
	13.44	1.241

QUANTITY, TYPE OF USE, PERIOD OF USE
The combined instantaneous quantity from the source, identified by Ecology's well tag # APG-192, shall not exceed 13.44 gallons per minute (gpm) for the three connections and 33 gpm between eight total residences, 1.241 acre-feet per year for continuous, year-round multiple domestic and incidental irrigation (0.034 acre 1,500 square feet) of lawn and garden seasonally between June 1 and September 30 annually.

LOCATION OF DIVERSION/WITHDRAWAL

APPROXIMATE LOCATION OF DIVERSION--WITHDRAWAL Approximately 1040 feet west and 1805 feet south from the northeast corner of Section 7.					
LOCATED WITHIN (SMALLEST LEGAL SUBDIVISION)	SECTION	TOWNSHIP N.	RANGE, E. W.M.	W.R.I.A.	COUNTY

Provisions continued:

Water Level Measurements

9. In order to maintain a sustainable supply of water and ensure that your water source is not impaired by future withdrawals, static water levels **should** be measured and recorded monthly using a consistent methodology. Static water level is defined as the water level in a well when no pumping is occurring and the water level has fully recovered from previous pumping. Static water level data should include the following elements:
- a. Unique Well ID Number.
 - b. Measurement date and time.
 - c. Measurement method (air line, electric tape, pressure transducer, etc.).
 - d. Measurement accuracy (to nearest foot, tenth of foot, etc.).
 - e. Description of the measuring point (top of casing, sounding tube, etc.).
 - f. Measuring point elevation above or below land surface to the nearest 0.1 foot.
 - g. Land surface elevation at the well head to the nearest foot.
 - h. Static water level below measuring point to the nearest 0.1 foot.

Water Use Efficiency

10. The water right holder is required to maintain efficient water delivery systems and use of up-to-date water conservation practices consistent with RCW 90.03.005.

Proof of Appropriation

11. Final beneficial use calculations for each connection to the Carmel Views water system, either independently or combined, shall be determined during the investigation at the Proof of Appropriation stage.
12. The water right holder shall file the notice of Proof of Appropriation of Water (under which the Certificate of Water Right is issued) when the permanent distribution system has been constructed and the quantity of water required by the project has been put to full beneficial use. The Certificate will reflect the extent of the project perfected within the limitations of the Permit. Elements of a proof inspection may include, as appropriate, the source(s), system instantaneous capacity, beneficial use(s), annual quantity, place of use, and satisfaction of provisions.

Schedule and Inspections

13. Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.

General Conditions

14. You (applicant) will pay to Ecology the sum of \$175.82, which represents a proportionate amount of the payment due and owing to the United States for storage and delivery of water under paragraph 15(a) of Water Storage and Exchange Contract No. 09XX101700, between the Bureau of Reclamation and the State of Washington Department of Ecology, Yakima Project, Washington, dated January 29, 2009. The consumptive use of 0.411 acre-feet from September 1 through March 31 is subject to the terms and conditions in the Water Storage and Exchange Contract No. 09XX101700.
15. You (applicant) will record with the Kittitas County Auditor a property covenant as required under WAC 173-539A-050 that restricts or prohibits trees or shrubs over a septic drain field on Parcel Nos. 953359; 953360, and 953361.
16. You (applicant) will record with the Kittitas County Auditor an appropriate conveyance instrument under which the applicant obtains an interest in Trust Water Right No. CS4-0225(A)CTCL@2 to offset consumptive use.
17. Any valid priority calls against the source Trust Water Right No. CS4-0225(A)CTCL@2, based on local limitations in water availability, will result in temporary curtailment of the use of water under the Permit until the priority call for water ends.
