Re: State - Artificially Stored Groundwater Permit Nos. & Federal – Water Service Contract Nos. QB-0060(B)/3-07-16-W2521, QB-0060(D), QB-0066(B)/3-07-16W2521, QB-0320/3-07-16-W2517, QB-1450/3-07-16-W5031, QB-1451/9-07-16-W4267, QB-1559/2-07-16-W4978, and QB-1560/2-07-16-W4979
WRIA 41 – Grant County – Quincy Groundwater Management Subarea

Dear Sirs:

On September 25, 2013 our office received applications for change to integrate multiple wells located within Sections 14, 23, 24, 26 & 27, T. 18 N., R. 25 E.W.M. associated with the above referenced permits. In response to that request on October 23, 2013 Jeff MacLennan conducted an onsite examination of the proposed wells. On October 8, 2014 Katherine Ryf conducted a follow up examination that included a modification to the proposed change request under QB-0060(B) to transfer 10 acres to areas previously non-permitted.

Based on the above evaluations your requests are hereby **APPROVED**.

Enclosed are QB-0060(B), QB-0060(D), QB-0066(B), QB-0320, QB-1450, QB-1451, QB-1559, QB-1560 and QB-1561. These permits authorize the use of artificially stored groundwater through the integration of eleven (11) wells within the Quincy Groundwater Management Subarea. Pursuant to Chapter 43.21B.310 RCW these decisions are appealable actions. The appeal procedures are described in the Permits.

Because the permits are partly or all together integrated to utilize the same wells a metering provision has been added to these water permits to require the installation of gauges or other measurement devices be installed where water is withdrawn to determine how much water is being used.

QB-0060(B), QB-0060(C), QB-0066(B), QB-0320, QB-1450,
QB-1451, QB-1559, and QB-1560

Page 2 of 2

November 12, 2014

Chapter 173-134A-080(2)(h) WAC states that no permit shall authorize the withdrawal of waters for agricultural irrigation use for more acres than authorized by federal reclamation law. It is the water users' responsibility to work with Reclamation to comply with this rule.

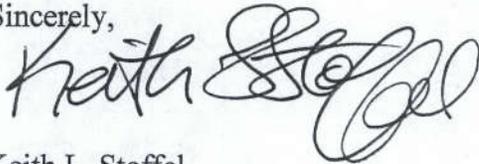

Future correspondence concerning the above should refer to Artificially Stored Groundwater Permit Nos. QB-0060(B), QB-0060(D), QB-0066(B), QB-0320, QB-1450, QB-1451, QB-1559, or QB-1560, respectively. Please direct all questions to:

Ecology: Katherine.Ryf@ecy.wa.gov; Spokane office 509-329-3586

Reclamation: Paula Chapel, MChapel@usbr.gov; Ephrata office 509-754-0225

In an effort to keep our records current, please notify our office of changes such as contact information (phone, address, etc.), property ownership, or variations in water use.

Sincerely,

Keith L. Stoffel
Section Manager

**WATER RESOURCES PROGRAM
PERMIT TO USE
ARTIFICIALLY STORED GROUND WATER**

**Quincy Groundwater Management Subarea
Columbia Basin Project**

Pursuant to Chapters 173-134A and 173-136 WAC

This water use permit is administered by the Department of Ecology (Ecology) and the U.S. Department of the Interior, Bureau of Reclamation (Reclamation) which authorizes the use of artificially stored ground water (ASGW) within the Quincy Groundwater Management Subarea (QGWMS), subject to Chapters 173-134A and 173-136 WAC, and to the specific parameters and provisions detailed below. This permit is not valid without obtaining and maintaining a federal Water Service Contract from Reclamation, which agreement requires compliance with certain provisions of federal law and the payment of an annual fee to Reclamation.

| | | |
|------------------------------------|-----------------|--------------------------|
| PRIORITY DATE February 10, 1972 | APPLICATION NO. | PERMIT NO. QB-0066(B) |
|------------------------------------|-----------------|--------------------------|

This permit supersedes QB-0066(B) issued January 21, 1992 per an Application for Change to integrate multiple wells located within Sections 14, 23, 24, 26 & 27, T. 18 N., R. 25 E.W.M.

PERMITTEE:

Primary

Jeffrey L. Cochran
5314 Road 13.9 SW
Royal City, Washington 99357

Co-Primary

Terry G. Cochran

ARTIFICIALLY STORED GROUND WATER TO BE USED:

2,200 gallons per minute, 890.05 acre-feet per year, from March 1st to October 31st, each year, for the agricultural irrigation of 254.3 acres.

SOURCE:

Eleven (11) wells: 4 wells to be no deeper than that described below and 7 wells to be no deeper than 200 feet into the basalt; all wells shall not penetrate the top of the Grand Ronde Basalt unit. It is the water users' responsibility to confirm the wells do not exceed these restrictions.

By issuance of this permit the below Well Depth Exemptions (WDE) are granted as allowed under Ch.173-134A-080(2)(d). No further WDE's will be granted without prior review by Ecology. Additionally, two wells are located within the 100 foot strip along the south boundary of the NE¼ of Sec. 14 as allowed by Amended Order No. DE 75-54; which requires withdrawals of ASGW to be located beginning 100 feet inside the exterior boundaries of the Winchester Wasteway Area to protect public and private interests of the QGWMS.

In the event that you encounter water availability concerns you must contact Ecology to discuss options prior to reworking, reconstructing, deepening or redrilling said wells.

DESCRIPTION OF PROPOSED WORK:

Drilled wells, irrigation and integrated water distribution system.

DEVELOPMENT SCHEDULE:

Completed; application of the water has been put to beneficial use.

If you do not maintain full water use as authorized the permit could be subject to reduction or cancellation due to non-use.

Failure of the Permittee to obtain and retain a License/Contract Agreement with Reclamation shall not be considered a delay in maintaining complete development of this water permit.

COMMINGLING WATER USE:

Ecology, Reclamation and the Columbia Basin Irrigation District administer an array of Water Service Contracts, Farm Unit (FU) Allotments, Artificially Stored Groundwater Permits and State Water Rights, including those for agricultural irrigation, municipal, industrial, and miscellaneous uses within the area of the proposed place of use, as depicted in the Exhibit A map. Washington water law does not allow for the stacking of water rights or water use authorizations. Any and all water use(s) at the proposed site locations will be evaluated by Ecology; if stacking of water occurs, the delivery of project water or the taking of water under this permit will need to be forfeited.

Ecology & Reclamation administers QB-0045(A), QB-0045(B), QB-0060(A), QB-0060(B), QB-0060(D), QB-0066(A), QB-0066(B), QB-0320, QB-1450, QB-1451, QB-1559 & QB-1560 that are partly or all together integrated to utilize the same wells. Therefore, a metering provision has been added to this water permit.

METERING REQUIREMENT:

An approved measuring device shall be installed and maintained for each of the sources identified by this water permit in accordance with the rule "Requirements for Measuring and Reporting Water Use", Chapter 173-173 WAC. Water use data shall be recorded annually and maintained by the property owner for a minimum of five years, and shall be promptly submitted to Ecology upon request.

LOCATION OF WITHDRAWAL:

APPROXIMATE LOCATION OF WITHDRAWAL - GPS LOCATION:

- N 47.05205° W 119.64411°; within the NE¼SE¼ of Sec. 14; Ecology Unique Well Id Tag No. BPH-715. To be no deeper than 200 feet into the basalt. Known as Sage Brush.
- N 47.05214° W 119.64254°; within the SE¼NE¼ of Sec. 14; Ecology Unique Well Id Tag No. BBH-054. To be no deeper than 200 feet into the basalt and 100 feet inside the exterior boundaries of the Winchester Wasteway Area as allowed under Amended Order No. DE 75-54. Known as sand well.
- N 47.05217° W 119.64284°; within the SE¼NE¼ of Sec. 14; Ecology Unique Well Id Tag No. BBH-061. To be no deeper than 745 feet and 100 feet inside the exterior boundaries of the Winchester Wasteway Area as allowed under Amended Order No. DE 75-54. Known as rock well.

- N 47.05015° W 119.64528°; within the NE¼SE¼ of Sec. 14; Ecology Unique Well Id Tag No. BPH-714. To be no deeper than 200 feet into the basalt. Known as S1.

Known as M11 & M11B

PROVISIONS:

This permit is subject to the water management regulations of Chapter 173-134A WAC which includes, but is not limited to the following:

1. The authorization to use artificially stored ground water in the Quincy Ground Water Sub-area is subject to regulation for the purpose of (a) protecting all rights to the use of public waters; (b) protecting the right of the Bureau of Reclamation; (c) protect the usability of ground-water withdrawal facilities of the Bureau of Reclamation, U.S. Department of the Interior, which facilities are used to convey water to Potholes Reservoir; (d) to prohibit interference in any manner with the furnishing of adequate supplies of both surface and ground water for satisfying present and future needs of the Columbia Basin Project from the Potholes Reservoir facility of the Bureau of Reclamation, U.S. Department of the Interior; and (e) to protect to the maximum extent possible, consistent with rights and interest in the ground waters of the Quincy Ground Water Sub-area, wildlife, recreation, and other values associated with the general public interest in the groundwater in the sub-area.
2. Failure of the permittee to comply with terms of an executed agreement with the Bureau of Reclamation, U.S. Department of Interior, which agreement is a requirement of this permit, shall constitute grounds to suspend or terminate this permit.
3. The installation of an access port for measuring the depth to water or a pressure gage to measure the shut-in pressure of flowing wells shall be required on the completed well or wells. The permittee may, for his own convenience, wish to install an airline and gage in addition to the access port.
4. All water wells constructed within the state shall meet the minimum standards for construction and maintenance as provided under chapter 18.104 RCW and chapter 173-160 WAC.
5. In times of shortage of water available to satisfy all ground-water withdrawals authorized under WAC 173-134A-080(2), the Department of Ecology shall reduce withdrawals in order of the Quincy Basin priority number assigned on the face of this permit, with the highest priority number being regulated against first. (WAC 173-134A-080(2)).
6. This permit does not establish or embody rights to ground water as provided by RCW 90.44.050 and RCW 90.44.060.
7. This permit authorizes a water duty of not more than 3.5 acre-feet per calendar year for each acre of land authorized to be irrigated. After development has been completed and permittee has identified his annual usage and the total number of acres actually irrigated to the satisfaction of the Department of Ecology, permittee is not precluded in future years from beneficial use of his total annual allocation on a lesser number of acres if necessary to satisfy the water requirement of a particular crop.
8. By accepting this permit, the permittee consents to provide for inspection, monitoring, entry, and reporting of data by or to the Department of Ecology and the Bureau of Reclamation, U.S. Department of the Interior.

9. This permit is subject to termination or modification, through issuance of supplement orders of the Department of Ecology, for good cause, including but not limited to:
 - a. Violation of a permit condition;
 - b. Obtaining a permit by misrepresentation or failure to fully disclose all relevant facts; and
 - c. The receipt of new facts or information that dictate that termination or modification of this permit is necessary to comply with the objectives of chapter 173-134A-WAC.
10. In accordance with Ch. 173-134A-080(2)(g) WAC ASGW Permits shall pertain to a specific point(s) of withdrawal, and purpose, and place of use. No assignment of such permits can be made without written approval of the department. The department may approve amendments to permits regarding changes in point of withdrawal, purpose, and place of use, if it believes, after investigation, that the amendment will comply with WAC 173-134A-070(1) through (4). Application for amendments shall be made on forms provided by the department. Amendments to either the purpose of use or place of use specified in this permit are available only for the amount of water placed to beneficial use as described in this permit. The department reserves the right, at its sole discretion, to correct any ministerial or clerical errors in the permit.
11. Eleven (11) wells: 4 wells to be no deeper than that described above and 7 wells to be no deeper than 200 feet into the Quincy Basalt Zone. The depth of the well(s) in any event shall not penetrate the top of the Grand Ronde Basalt unit. (WAC 173-134A-080(2)(d)).
12. The water source and/or water transmission facilities are not wholly located upon land owned by the applicant. Issuance of a permit by this department for appropriation of the waters in question does not convey a right of access to, or other right to use, land which the applicant does not legally possess. Obtaining such a right is a private matter between applicant and owner of that land.
13. The Landowner assumes responsibility, during the life of this Permit, for disposal of irrigation runoff in connection with irrigating farming of the described land so as not to damage Project facilities or other properties. Failure of the Landowner to properly dispose of irrigation runoff may result in Permit termination, after the District or United States giving reasonable notice and opportunity to comply therewith. The Landowner shall be liable for any and all damage to the property of the United States, or of any third parties, by reason of the exercise of the privileges conferred by this Permit.
14. In the event that a Water Service Contract (WSC) or other agreement or authorization is obtained for this project from either Ecology, Reclamation or one of the Columbia Basin Irrigation Districts this water permit may be subject to cancellation.
15. An approved measuring device shall be installed and maintained for each of the sources identified by this water permit in accordance with the rule "Requirements for Measuring and Reporting Water Use", Chapter 173-173 WAC. Water use data shall be recorded annually and maintained by the property owner for a minimum of five years, and shall be promptly submitted to Ecology upon request.

16. This permit states that water has been put to beneficial use. If the permittee does not maintain full water use as authorized the permit could be subject to reduction or cancellation due to non-use.

APPEAL PROCEDURES:

Pursuant to Chapter 43.21B.310 RCW this water use permit decision is an appealable action.

YOUR RIGHT TO APPEAL

You have a right to appeal this permit to the Pollution Control Hearings Board (PCHB) within 30 days of the date of receipt of this decision. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do all of the following within 30 days of the date of receipt of this permit decision:

- File your appeal and a copy of this permit decision with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this permit decision on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

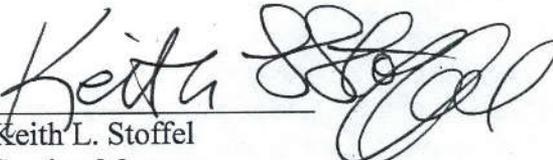

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
