6. Remarks and Other Relevant Information:

In Spring 2015, Beaumont Well (AHJ191) demonstrated that it would be insufficient to provide water for the full irrigation rights under G3-28551C and G3-23865C (combined water rights for 470 gpm, 227.5 acft/yr, irrigation 65 acres). Given the current water shortage and pending drought conditions, Beaumont immediately tested locations for new wells. Beaumont and Tommer jointly drilled and constructed the New Well/Tommer Well (BIO287) in Section 34 for in order to irrigate the Beaumont apple and cherry crops.

This application would allow for temporary change to use the New Well/Tommer Well (BIO 287) as a point of withdrawal for G3-23865C. A mirror application for temporary change is also being submitted for water right G3-28551C.

See attached narrative for further details.

*This temporary change will terminate on the earlier of 1 year or approval of the applications for change being concurrently submitted for water rights G3-28551C and G3-23865C to add the New Well/Tommer Well (BIO 287) as an additional point of withdrawal.

IF FOR SEASONAL OR TEMPORARY, START DATE 5/15/2015 END DATE 5/15/16*
