PROVISIONS

All conditions and requirements contained in reports of examination or permits previously issued apply to this certificate unless specifically noted below.

The subject well shall be cased and permanently sealed into the basalt to a point just above the water bearing zone. Such sealing shall be performed in accordance with the provisions and standards of WAC 173-160-245 through WAC 173-160-285 (Minimum Standards for Construction and Maintenance of Wells.

Use of water under this authorization shall be contingent upon the water right holder's utilization of up to date water conservation practices and maintenance of efficient water delivery systems consistent with established regulation requirements and facility capabilities.

At such time that the Department of Ecology determines that management of the subject waters is necessary and in the public interest, an approved measuring device shall be installed and maintained in accordance with RCW 90.03.360 or WAC 508-64-020 through WAC 508-64-040.

The amount of water granted is a maximum limit that shall not be exceeded and the water user shall be entitled only to that amount of water within the specified limit that is beneficially used and required for the actual crop grown on the number of acres and the place of use specified.

This authorization to make use of public waters of the state is subject to existing rights, including any existing rights held by the United States for the benefit of Indians under treaty or otherwise.

Maintenance of an access port as described in Ground Water Bulletin No. 1 is required. An airline and gage may be installed in addition to, the access port.

Provisions continued on page 3.

The right to use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, except as provided in RCW 90.03.380, 90.03.390, and 90.44.020.

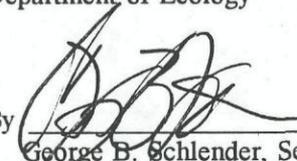

This certificate of water right is specifically subject to relinquishment for non-use of water as provided in RCW 90.14.180.
