Mr. & Mrs. Larry Walker  
6419 North Howard  
Spokane, Washington 99208-4055

WASHINGTON STATE  
DEPARTMENT OF  
E C O L O G Y

**STATE OF WASHINGTON  
CERTIFICATE OF WATER RIGHT**

**Document Title:** Certificate of Water Right

**Agency:** Department of Ecology  
Eastern Regional Office  
4601 North Monroe  
Spokane, WA 99205-1295

**Applicant:** Larry & Nancy Walker  
6419 North Howard  
Spokane, Washington 99208-4055

**Reference Number:**

PRIORITY DATE	APPLICATION NUMBER	PERMIT NUMBER	CERTIFICATE NUMBER
October 2, 1995	S3-29891	S3-29891	S3-29891

*This is to certify that the herein named applicant has made proof to the satisfaction of the Department of Ecology of a right to the use of the public waters of the State of Washington as herein defined, and under and specifically subject to the provisions contained in the Permit issued by the Department of Ecology, and that said right to the use of said waters has been perfected in accordance with the laws of the State of Washington, and is hereby confirmed by the Department of Ecology and entered of record as shown, but is limited to an amount actually beneficially used.*

**PUBLIC WATERS TO BE APPROPRIATED**

SOURCE	TRIBUTARY OF (IF SURFACE WATERS)		
Marshall Lake	Pend Oreille River		
MAX. CUBIC FEET PER SECOND	MAX. GALLONS PER MINUTE	MAX. ACRE-FEET PER YEAR	
0.02		1.0	

QUANTITY/TYPE OF USE/PERIOD OF USE

0.02 cubic foot per second, 1 acre-foot per year, continuously, for in-house domestic supply for a recreational lot

**LEGAL DESCRIPTION OF LOCATION OF DIVERSION/WITHDRAWAL**

**CONTINUED LEGAL DESCRIPTION FOR LOCATION OF DIVERSION/WITHDRAWAL**

Lot 3A of Shady Side Tracts

**CONTINUED LEGAL DESCRIPTION FOR PROPERTY ON WHICH WATER IS TO BE USED**

Continued on page 7

**PROVISIONS**

All conditions and requirements contained in reports of examination or permits previously issued apply to this certificate unless specifically noted below.

An approved measuring device shall be installed and maintained in accordance with RCW 90.03.360 and/or WAC 508-64-020 through WAC 508-64-040.

The amount of water granted is a maximum limit that shall not be exceeded and the water user shall be entitled only to that amount of water within the specified limit that is beneficially used and required.

This authorization to make use of public waters of the State is subject to existing rights, including any existing rights held by the United States for the benefit of Indians under treaty or otherwise.

Nothing in this authorization shall be construed as satisfying other applicable federal, state, or local statutes, ordinances, or regulations.

This certificate shall be issued subject to Washington Department of Fish and Wildlife screening criteria as outlined in a Hydraulic Project Approval. Please contact the Department of Fish and Wildlife, 600 Capitol Way North, Olympia, Washington 98501-1091, Attention: Habitat Management Division, Phone (360) 902-2534, to obtain specific requirements for your project.

(Continued on page 3)

**The right to use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, except as provided in RCW 90.03.380, 90.03.390, and 90.44.100.**

**This certificate of water right is specifically subject to relinquishment for non-use of water as provided in Chapter 90.14 RCW.**

*Given under my hand and the seal of this office at Spokane, Washington,  
this 7th day of October, 1999.*

Provisions Continued

Use of water under this authorization shall be contingent upon the water right holder's utilization of up to date water conservation practices and maintenance of efficient water delivery systems consistent with established regulation requirements and facility capabilities.

The Washington State Department of Fish and Wildlife (WDFW), has recommended that water rights from the Pend Oreille River be conditioned with instream flows of 7,700 cubic feet per second (cfs) on a year-round basis (as measured at the gage near Newport, Washington).

The following hydrographs for the U.S.G.S. Gage on the Pend Oreille River at Newport, Idaho (12395500) demonstrate important hydrologic characteristics of the Pend Oreille River. Before the construction of the Albeni Falls Dam, the river exhibited normal, riverine flow conditions. The first hydrograph shows the typical late summer flow regime for 10 different water years in the 1930s and early 1940s. The solid line at 7700 cfs represents WDFW's recommended instream flow value as it would have applied to the river in the 1930s. When summer flows reached their baseflow, they tended to stay down at that level for the remainder of the water year.

**Pend Oreille R at Newport**  
12395500

With the construction of the Albeni Falls dam in 1952, the character of the daily discharge changed dramatically from a riverine regime to an impounded, highly regulated, flow regime. The next hydrograph depicts the late summer, daily average discharge for a ten-year period in the 1980s through the early 1990s. The highly variable discharge data reflects the flows that result from the power generation demands that are placed on the river.

Pend Oreille R at Newport  
12395500

Trying to devise a methodology to implement the WDFW recommended instream flow given the current flow regime of the river requires some careful consideration of the day-to-day variability of the discharge. Given its fluctuations, just simply regulating junior water rights every time the daily average flow drops below 7700 cfs (the recommended instream flow) would be inappropriate and unworkable. Examining the data in the hydrograph indicates that the day-to-day variability is on the order of 5,000 cfs. Looking at a suite of duration frequency low flow analyses (7-day, 14-day, 21-day, and 30-day) for the 1970 through 1996 period allows us to get a better handle on when the flow in the river is truly flowing at a rate that is below the recommended instream flow. By looking at the actual daily flow data, we can see that three water years during the period 1970 – 96 exhibited sustained, low flow periods that were lower than the 7700 cfs threshold (1977, 1988, and 1994). The data from the duration frequency analysis shows that using a 14-day low flow criteria gives us the best opportunity to identify the low flow events.

### Pend Oreille River Low Flow Analysis

Calculating the exceedance probability for the daily average flows for the period 1970 – 96 allows us to see how frequently (on a yearly basis) and for what duration (how many weeks during each year) the flows on the Pend Oreille River can be expected to be below the recommended instream flow. The following graph demonstrates that on average, we can expect the summer low flows in the Pend Oreille River will be above the instream flow 8 to 9 times out of ten years. During that one in ten year event when the flow in the river is below the recommended flow, the low flow will last for approximately one month (typically August).

Therefore, this certificate shall be conditioned that all diversion shall cease when the 14-day average flow in the Pend Oreille River falls below 7700 cfs (as measured at the Pend Oreille River at Newport gage) as recommended by WDFW.

Legal Description and Provisions Continued

Legal Description Continued.

A tract of land lying in the North half of Sec. 23, T. 32 N., R. 45 E.W.M., in the County of Pend Oreille, Washington, more specifically described as follows:

Beginning at a point which is North  $35^{\circ}54\frac{1}{2}'$  West a distance of 219.37 feet; Thence North  $34^{\circ}46'$  East a distance of 76.28 feet; Thence North  $42^{\circ}59'$  East a distance of 119.75 feet, Thence  $72^{\circ}48\frac{1}{2}'$  East a distance of 100 feet; Thence North  $64^{\circ}41'$  East a distance of 200 feet; Thence North  $75^{\circ}44\frac{1}{2}'$  East a distance of 100 feet; Thence South  $86^{\circ}36\frac{1}{2}'$  East a distance of 259.82 feet; Thence North  $29^{\circ}18\frac{1}{2}'$  East a distance of 82.26 feet; Thence North  $29^{\circ}25'$  East a distance of 260.90 feet; Thence North  $24^{\circ}57\frac{1}{2}'$  East a distance of 97.21 feet; Thence North  $11^{\circ}42\frac{1}{2}'$  West a distance of 100 feet; Thence North  $16^{\circ}51'$  West a distance of 94.38 feet from a concrete monument on the west shore of Marshall Lake and on the East West Centerline of said Sec. 23, a distance of 1972.6 feet East of the West  $\frac{1}{4}$  corner of said Sec. 23, the true point of beginning, Thence North  $4^{\circ}14\frac{1}{2}'$  East a distance of 100 feet; Thence North  $35^{\circ}30'$  East a distance of 50 feet; Thence North  $74^{\circ}5'9''$  West a distance of 171.85 feet; Thence South  $22^{\circ}52'$  West a distance of 54.66 feet; Thence South  $10^{\circ}56'$  West a distance of 149.71 feet; Thence North  $86^{\circ}51\frac{1}{2}'$  East a distance of 178.73 feet; to the true point of beginning
