Tiffania Boisen
2939 N River Road
Cosmopolis WA 98537

Dear Ms. Boisen:

Re: Water Right Permit No. S2-29684

The requests for assignment of the above referenced numbers have been processed. Our records have been changed to reflect the assignment and future correspondence will be sent to you, unless we are otherwise advised.

If you contact us in the future regarding these water rights, it will help us serve you more quickly if you refer to the referenced number.

If you have any questions or concerns, please contact Sheri Carroll at (360) 407-0240 or myself at (360) 407-0270.

Sincerely,

A handwritten signature in cursive script that reads "Teresa Hanson".

DEPARTMENT OF ECOLOGY

**INSTRUCTIONS FOR ASSIGNMENT OF APPLICATION OR PERMIT TO APPROPRIATE
OR STORE WATER**

**A NON-REFUNDABLE \$5.00 FEE MUST ACCOMPANY THE FILING OF THIS
ASSIGNMENT.**

MAKE CHECKS OR MONEY ORDERS PAYABLE TO THE DEPARTMENT OF ECOLOGY.

Introduction:

A water right application requests that a proposed beneficial water use be authorized, while a permit grants authority to develop a beneficial water use. A water right is established if water is put to beneficial water use(s) as authorized by a permit. A water right, once established, attaches to the land upon which it is legally used. It is not necessary to assign a water right certificate or a water right claim. It is required by statute that an assignment be filed for applications and permits (90.03.310 RCW).

To remain a viable application or permit, the person(s) owning it must maintain the ability to develop a water use(s) upon the property identified as the place of water use. Normally only the property owner, a lessee, or a legally recognized water system has authority to develop a water use upon a parcel of land.

An assignment of an application or permit is not valid until filed with the Department of Ecology. An assignment is made whenever it is desired to transfer all or part of the responsibility and/or interest in an application or a permit to appropriate or store water. Normally an assignment is made if the application/permit holder(s) sells the place water is to be used to another person.

The person(s) receiving the application/permit may be required to provide additional information prior to acceptance of the assignment. For example, information may be requested showing that the assignment is in compliance with the provisions of the Family Farm Water Act, Chapter 90.66 RCW.

Instructions: Complete the Assignment Form in ink.

Part 1. The name(s) of the holder of the application or permit must be identified. Secondly, the application/permit number given by the Department of Ecology must be identified. Identify the water source associated with the application/permit. The water source is the river stream, spring, well or other features from which water is obtained. Identify the name(s) of the person(s) being assigned the application or permit. Indicated whether the entire application/permit or only a portion is being assigned. If only a portion is being assigned, you must prepare an attachment fully describing what water quantities, purpose(s) of use, and acreage are being assigned. An attachment may be used to complete any information required by this form.

Part 2. Provide a reason why the assignment is being made. Understanding the purpose of the assignment will assist us in evaluating whether an assignment is appropriate and help us to provide advice to the new application/permit holder. For example, you could enter "sale of property" if that is the case.

Part 3. The place of use to be effected by the assignment must be identified. Providing the specific place of use information will eliminate errors that could be made in the administration of the application/permit.

Part 4. Indicate whether or not the assignment will have impact upon the timing of the development schedule as stated within the application/permit. If there will be any delay, include a statement proposing a new development schedule.

Part 5. The holder(s) of the application/permit and the person(s) to which it is being assigned must provide their signatures and addresses. The person(s) being assigned the application/permit must also provide a telephone number, if available. The addresses provided on the assignment form will be assumed to supercede any addresses already contained within the application/permit record. The formal place of contact will be considered the address and telephone number provided of the person(s) being assigned the application/permit upon acceptance of the assignment.

Notary Signature Block: The signature of the current holder of the application/permit must be notarized.

September 14, 1998

Dear Water Right Applicant:

Re: Water Right Application No. S2-29684

This letter is to acknowledge that the Washington State Department of Ecology received your water right application. We have assigned your application the number indicated above. Please include this number in future correspondence regarding your application with the Department of Ecology.

When we begin actively evaluating applications in your area, we will prepare a public notice and send it to you with publication instructions. It will be sometime before we are able to begin working in your area. In the meantime, please notify Ecology of changes such as address, property ownership, or variations in your proposed water use plans.

The availability of water in Washington state is a serious problem. Much of the water in our state has already been appropriated. The competition for water has escalated with our state's increasing population, conflicting water policy issues, and grave declines in salmon and other fish populations. A new watershed management law brings us a step closer to addressing some of these issues. It sets into motion a locally based process to address water quantity, quality, and habitat issues. Watershed management will help meet challenges for getting water to people, industries, farms, and fish.

In some areas of the state, we are continuing to evaluate applications within watersheds where we have previously gathered information and completed watershed assessments. We are also continuing to process water right permit or change applications that are intended to address public health and safety emergencies, the natural environment, or are for nonconsumptive withdrawals. All other applications are grouped by watershed and processed according to the date of submittal, and when we have enough information and staff resources to make decisions.

If you would like further information on your application, please contact the Southwest Regional Office at (360) 407-0240.

Sincerely,

J. Mike Harris
