Re: Water Right Extension Permit No. CS2-SWC 2929

Dear Ms. Lattimore:

The Town of Cathlamet is requesting and extension for Water Right CS2-SWC 2929 in light of the following:

1. The Town of Cathlamet Water Filtration Plant has a filter capacity for 1MGD, but the pumping capacity was limited by the available water rights at that time to .860MGD. The Town purchased what is now CS2-SWC 2929 when it became available in 2001 to have the ability to increase the plant capacity to 1MGD.
2. Current certificated water rights have an instantaneous flow of 1.33 CFS or 600GPM as of 2007 this falls short of the of the 18 hour source capacity requirements that are in Table 3-11 of the Town of Cathlamet's Water System Plan. The Town is proceeding with and engineering review of options for increasing the pumping capacity.
3. The Town has also applied for Watershed Plan Implementation Funds to investigate the feasibility of developing a supplemental ground water source that would be less subject to the high turbidity events during the winter, and providing some redundancy improving the overall source reliability. Depending on findings the Town may desire to transfer the unused portion of CS2-SWC-2929 to a ground water source.

Sincerely,

David L. Vik  
Public Works Supt.
