

State of Washington
**REPORT OF EXAMINATION
 FOR WATER RIGHT APPLICATION**

File NR: G4-35634
 WR Doc ID: 5803355

PRIORITY DATE
 June 27, 2013

WATER RIGHT NUMBER
 G4-35634

MAILING ADDRESS
 ELI SHOVAL
 C/O MAIZEL & ASSOC
 9311 SE 36TH ST #112
 MERCER ISLAND WA 98040

SITE ADDRESS (IF DIFFERENT)
 Woods and Steele Road
 Cle Elum WA 98922

Quantity Authorized for Withdrawal or Diversion

| WITHDRAWAL OR DIVERSION RATE | UNITS | ANNUAL QUANTITY (AF/YR) |
|------------------------------|-------|-------------------------|
| 4.48 | GPM | 0.414 |

Purpose

| PURPOSE | WITHDRAWAL OR DIVERSION RATE | | | ANNUAL QUANTITY (AF/YR) | | PERIOD OF USE (mm/dd) |
|-----------------|------------------------------|--------------|-------|-------------------------|--------------|--------------------------|
| | ADDITIVE | NON-ADDITIVE | UNITS | ADDITIVE | NON-ADDITIVE | |
| Domestic Single | 4.48 | | GPM | 0.392 | | 01/01 - 12/31 |
| Irrigation | | 4.48 | GPM | 0.022 | | 06/01 - 09/30 |

REMARKS

The combined instantaneous quantity from the well identified by Ecology's unique well tag # APG-193 shall not exceed 33 gallons per minute (gpm) between 7 total connections.

LEGAL DESCRIPTION OF AUTHORIZED PLACE OF USE

Lot 1 of **WEDGEWOOD ESTATES**, according to the plat recorded in Volume 12 of Plats at pages 12-14, records of Kittitas County, Washington.

Proposed Works

The subject well was drilled in 2006 (Ecology unique well ID # APG-193) to a depth of 123 feet. A 6-inch casing and a 5-horsepower submersible pump are installed in the well. The delivery system includes an 87-gallon pressure tank and uses 2-inch PVC for the 1,900 lineal feet of mainline outgoing pipes. Water from this well will be used for this project for indoor domestic and outdoor irrigation supply. With the addition of this proposal, water from this well will be used for multiple domestic and incidental irrigation supplies totaling 7 connections, with this proposal being the final and last approved connection to the system. Wedgewood Estates is a Department of Health (DOH)-approved Group B community, private water system and will be regulated by DOH.

Domestic wastewater will be discharged to an individual on-site system, pursuant to the Declaration of Covenant signed June 20, 2013, by the subject applicant.

Development Schedule

| BEGIN PROJECT | COMPLETE PROJECT | PUT WATER TO FULL USE |
|---------------|-------------------|-----------------------|
| Begun | December 31, 2023 | December 31, 2027 |

Measurement of Water Use

| | |
|---|--------------------------------------|
| How often must water use be measured? | Bi-weekly* |
| How often must water use data be reported to Ecology? | Annually (Jan 31) |
| What volume should be reported? | Total Annual Volume (af/yr) |
| What rate should be reported? | Annual Peak Rate of Withdrawal (gpm) |

*Bi-weekly means every two weeks.

Provisions

A. Wells, Well Logs and Well Construction Standards

1. The subject well and the right to use water from it are restricted to and authorized for the Spex Arth Creek alluvial sediment aquifer.
2. All wells constructed in the state shall meet the construction requirements of WAC 173-160 titled "Minimum Standards for the Construction and Maintenance of Wells" and RCW 18.104 titled "Water Well Construction." Any well which is unusable, abandoned, or whose use has been permanently discontinued, or which is in such disrepair that its continued use is impractical or is an environmental, safety or public health hazard shall be decommissioned.
3. All wells shall be tagged with a Department of Ecology unique well identification number. If you have an existing well and it does not have a tag, please contact the well-drilling coordinator at

the regional Department of Ecology office issuing this decision. This tag shall remain attached to the well. If you are required to submit water measuring reports, reference this tag number.

4. In accordance with WAC 173-160, wells shall not be located within certain minimum distances of potential sources of contamination. These minimum distances shall comply with local health regulations as appropriate. In general, wells shall be located at least 100 feet from sources of contamination. Wells shall not be located within 1,000 feet of the boundary of a solid waste landfill.

B. Measurements, Monitoring, Metering, and Reporting

1. An approved measuring device shall be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use," WAC 173-173 and WAC 173-539A-070.
2. Water use shall be recorded **bi-weekly** and maintained by the property owner for a minimum of five years. The maximum rate of withdrawal and the annual total volume shall be submitted to the Department of Ecology (Ecology) by January 31st of each calendar year.
3. Recorded water use data shall be submitted via the Internet. To set up an Internet reporting account, contact the Central Regional Office. If you do not have Internet access, you can still submit hard copies by contacting the Central Regional Office for forms to submit your water use data.
4. WAC 173-173 describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition Ecology for modifications to some of the requirements.

C. Water Level Measurements

1. In order to maintain a sustainable supply of water and ensure that your water source is not impaired by future withdrawals, static water levels **should** be measured and recorded monthly using a consistent methodology. Static water level is defined as the water level in a well when no pumping is occurring and the water level has fully recovered from previous pumping. Static water level data **should** include the following elements:
 - Unique Well ID Number.
 - Measurement date and time.
 - Measurement method (air line, electric tape, pressure transducer, etc.).
 - Measurement accuracy (to nearest foot, tenth of foot, etc.).
 - Description of the measuring point (top of casing, sounding tube, etc.).
 - Measuring point elevation above or below land surface to the nearest 0.1 foot.
 - Land surface elevation at the well head to the nearest foot.
 - Static water level below measuring point to the nearest 0.1 foot.

D. Department of Health Requirements

1. Prior to any new construction or alterations of a public water supply system, the State Board of Health rules require public water supply owners to obtain written approval from the Office of Drinking Water of the Washington State Department of Health. Please contact the Office of Drinking Water prior to beginning (or modifying) your project at DOH:

Department of Health, Division of Environmental Health
16201 E. Indiana Avenue, Suite 1500
Spokane Valley, WA 99216
(509) 329-2100.

E. Water Use Efficiency

1. The water right holder is required to maintain efficient water delivery systems and use of up-to-date water conservation practices consistent with RCW 90.03.005.

F. Proof of Appropriation

1. Final beneficial use calculations for each connection to the Wedgewood Estates water system, either independently or combined, shall be determined during the investigation at the Proof of Appropriation stage.
2. The water right holder shall file the notice of Proof of Appropriation of water (under which the certificate of water right is issued) when the permanent distribution system has been constructed and the quantity of water required by the project has been put to full beneficial use. The certificate will reflect the extent of the project perfected within the limitations of the permit. Elements of a proof inspection may include, as appropriate, the source(s), system instantaneous capacity, beneficial use(s), annual quantity, place of use, and satisfaction of provisions.

G. Schedule and Inspections

1. Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.

H. General Conditions

1. You (applicant) will pay to Ecology the sum of **\$55.44**, which represents a proportionate amount of the payment due and owing to the United States Department of Reclamation for storage and delivery of water under Paragraph 15(a) of the Water Storage and Exchange Contract No. 09XX101700, (Contract) between the United States Department of Reclamation and the State of Washington Department of Ecology, Yakima Project, Washington, dated January 29, 2009.¹ The consumptive use of 0.072 acre-feet from September 1 through March 31 is subject to the terms and conditions in the Contract.

¹"Long-Term Water Storage and Exchange Agreement between the United States Department of Reclamation and the State of Washington, Department of Ecology" (Contract No. 09XX101700), http://www.ecy.wa.gov/programs/wr/cro/images/pdfs/exchangecontract_012909.pdf, accessed on November 5, 2013.

2. You (applicant) will record with the Kittitas County auditor a property covenant as required under WAC 173-539A-050 that restricts or prohibits trees or shrubs over a septic drain field on Parcel No. 957004.
3. You (applicant) will record with the Kittitas County Auditor an appropriate conveyance instrument under which the applicant obtains an interest in Trust Water Right No. S4-05259CTCL@2sb7 to offset consumptive use.
4. Any valid priority calls against the source Trust Water Right No. S4-085259CTCL@2sb7, based on local limitations in water availability, will result in temporary curtailment of the use of water under the permit until the priority call for water ends.

Findings of Facts

Upon reviewing the investigator's report, I find all facts, relevant and material to the subject application, have been thoroughly investigated. Furthermore, I concur with the investigator that water is available from the source in question; that there will be no impairment of existing rights; that the purpose(s) of use are beneficial; and that there will be no detriment to the public interest.

Therefore, I ORDER approval of Application No. G4-35634, subject to existing rights and the provisions specified above.

YOUR RIGHT TO APPEAL

You have a right to appeal this Decision to the Pollution Control Hearings Board (PCHB) within 30 days of the date of receipt of this Decision. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do all of the following within 30 days of the date of receipt of this Decision:

- File your appeal and a copy of this Decision with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Decision on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

BACKGROUND

This report serves as the written findings of fact concerning Water Right Application Number G4-35634.

Priority Processing

This application is being priority processed because it qualified under the criteria under which an application may be processed prior to competing applications (WAC 173-152).

Table 1: Summary of "Requested" Water Right

| | |
|----------------------------|---|
| Applicant Name | Eli Shoal |
| Date of Application | June 27, 2013 |
| Place of Use | Lot 1 of WEDGEWOOD ESTATES, according to the plat recorded in Volume 12 of Plats at pages 12-14, records of Kittitas County, Washington. (Parcel No. 957004.) |

| County | Waterbody | Tributary To | WRIA |
|----------|-------------|--------------|-----------------|
| Kittitas | Groundwater | | 39-Upper Yakima |

| Purpose | Rate | Unit | Ac-ft/yr | Begin Season | End Season |
|-----------------|------|------|----------|--------------|------------|
| Domestic Single | 33 | GPM | 0.392 | 01/01 | 12/31 |
| Irrigation | 33 | GPM | 0.022 | 06/01 | 09/30 |

| Source Name | Parcel | Well Tag | Twp | Rng | Sec | QQ Q | Latitude | Longitude |
|-------------|--------|----------|-----|-----|-----|------|----------|-----------|
| 1 Well | 957004 | APG-193 | 19N | 15E | 07 | SWNE | | |

GPM = Gallons per Minute; Ac-ft/yr = Acre-feet per year; Sec. = Section; QQ Q = Quarter-quarter of a section; WRIA = Water Resource Inventory Area.

Legal Requirements for Approval of Appropriation of Water

RCW 90.03 and 90.44 authorize the appropriation of public water for beneficial use and describes the process for obtaining water rights. Laws governing the water right permitting process are contained in RCW 90.03.250 through 90.03.340 and RCW 90.44.050. In accordance with RCW 90.03.290, determinations must be made on the following four criteria in order for an application for water rights to be approved:

- Water must be available.
- There must be no impairment of existing rights.
- The water use must be beneficial.
- The water use must not be detrimental to the public interest.

Public Notice

RCW 90.03.280 requires that notice of a water right application be published once a week, for two consecutive weeks, in a newspaper of general circulation in the county or counties where the water is to be stored, diverted and used. Notice of this application was published in The Daily Record of Ellensburg, Washington on August 3rd and August 10th, 2013. No comments or protests were received by the Ecology during the 30-day comment period.

Consultation with the Department of Fish and Wildlife

Ecology must give notice to the Department of Fish and Wildlife of applications to divert, withdraw, or store water (RCW 77.57.020). Notice was officially provided on January 6, 2014, during a Yakima Water Transfer Workgroup (WTWG) meeting. A positive response was communicated in response to this proposal.

State Environmental Policy Act (SEPA)

A water right application is subject to a SEPA threshold determination (i.e., an evaluation whether there are likely to be significant adverse environmental impacts) if any one of the following conditions are met.

- (a) It is a surface water right application for more than 1 cubic-foot per second (cfs), unless that project is for agricultural irrigation, in which case the threshold is increased to 50 cfs, so long as that irrigation project will not receive public subsidies.
- (b) It is a groundwater right application for more than 2,250 gallons per minute (gpm).
- (c) It is an application that, in combination with other water right applications for the same project, collectively exceeds the amounts above.
- (d) It is a part of a larger proposal that is subject to SEPA for other reasons (e.g., the need to obtain other permits that are not exempt from SEPA).
- (e) It is part of a series of exempt actions that, together, trigger the need to do a threshold determination, as defined under WAC 197-11-305.

Because this application does not meet any of these conditions for Water Resources, it is categorically exempt from SEPA and a threshold determination is not required.

INVESTIGATION

Site Visit

A site visit was performed by Candis Graff and Anna Hoselton, Ecology personnel, on June 7, 2011, for a previous application proposing to use the same source.

Other Rights Appurtenant to the Place of Use

No other water rights are appurtenant to the proposed place-of-use. Other water rights in the vicinity are summarized on ATTACHMENT 2 in **Table 3** below.

Proposed Use and Basis of Water Demand

The DOH-approved Group B water system, Wedgewood Estates, became effective on February 20, 2010, and is approved for 7 connections. With the approval of this application, all 7 connections have permit status. The source is metered.

The December 2009 *Water System Design Manual*² (WSDM) by DOH contains guidance for establishing water demands. The suggested methods, in order of preference, include:

1. Metered water production and use records.
2. Comparable metered water production and use data from analogous water systems. See WAC 246-221(3)(a) and Section 5.2.3.
3. The criteria presented in Chapter 5.

According to the WSDM, new systems or systems that have no source meter records, information can be obtained from analogous water systems or from information presented in Appendix D of the WSDM in order to estimate Average Daily Demand (ADD) and Maximum Daily Demand (MDD) for residential connections (WAC 246-290-221(3)).³ Analogous water systems are defined in Section 5.2.3 of the WSDM as systems with similar characteristics such as, but not limited to: demographics, housing size, lot sizes, climate, conservation practices, use restrictions, soils and landscaping, and maintenance practices. As such, a reasonable level for MDD for in-house use can be established at 350 gpd/ERU.

The MDD values are set at 350 gpd/equivalent residential unit, which is consistent with the WSDM. Under WAC 173-539A, 30% of domestic in-house use on a septic system is assumed to be consumptively used and 90% of outdoor use is assumed to be consumptive.

Monthly and annual use at full build-out of the project were calculated based on the proposed 1 ERU, based on DOH's MDD, Ecology's Guidance Document 1210, *Determining Irrigation Efficiency and Consumptive Use*, the *Washington Irrigation Guide* (WIG) for outdoor use, and the assumptions found in WAC 173-539A. A crop irrigation requirement (CIR) for grass in the Cle Elum area of 18.11 inches was estimated using the WIG. Assuming the outdoor use is 90% consumptive, consistent with WAC 173-539A, and applying the WIG's CIR, the outdoor water requirement for 500 sq-ft (0.011 acre) of grass is 0.019 acre-feet per year (ac-ft/yr). The calculated consumptive use and total calculation considered factors specified in WAC 173-539A and are summarized in **Table 2** below.

Table 2: *Estimated total and Consumptive Use

| | Jan | Feb | Mar | Apr | May | June | July | Aug | Sep | Oct | Nov | Dec | Annual |
|-------------------------------|------|------|------|------|------|------|------|------|------|------|------|------|--------|
| Total Use (acre-feet) | .033 | .030 | .033 | .032 | .033 | .036 | .040 | .038 | .036 | .033 | .032 | .033 | .414 |
| Total Consumptive (acre-feet) | .010 | .009 | .010 | .010 | .010 | .013 | .017 | .015 | .013 | .010 | .010 | .010 | .137 |

*Quantities are rounded

² Department of Health, "Water System Design Manual," Olympia, WA, 2009, pp. 27-32.

³ Department of Health, "Water System Design Manual," Olympia, WA, 2009, pp. 28, www.doh.wa.gov/chp/dw/Publications/331-123.pdf, accessed on May 23, 2013.

Impairment Considerations

Impairment is an adverse impact on the physical availability of water for a beneficial use that is entitled to protection. A water right application may not be approved if it would:

- Interrupt or interfere with the availability of water to an adequately constructed groundwater withdrawal facility of an existing right. An adequately constructed groundwater withdrawal facility is one that:
 - (a) is constructed in compliance with well construction requirements and
 - (b) fully penetrates the saturated zone of an aquifer or withdraws water from a reasonable and feasible pumping lift.
- Interrupt or interfere with the availability of water at the authorized point of diversion of a surface water right. A surface water right conditioned with instream flows may be impaired if a proposed use or change would cause the flow of the stream to fall to or below the instream flow more frequently or for a longer duration than was previously the case.
- Interrupt or interfere with the flow of water allocated by rule, water rights, or court decree to instream flows.
- Degrade the water quality of the source to the point that the water is unsuitable for beneficial use by existing users (e.g., via sea water intrusion).

Water Availability

For water to be available for appropriation, it must be both physically and legally available.

Physical Availability

For water to be physically available for appropriation there must be ground or surface water present in quantities and quality and on a sufficiently frequent basis to provide a reasonably reliable source for the requested beneficial use or uses. In addition, the following factors are considered:

- Volume of water represented by senior water rights, including federal or tribal reserved rights or claims.
- Water right claims registered under RCW 90.14.
- Ground water uses established in accordance with RCW 90.44, including those that are exempt from the requirement to obtain a permit.
- Potential riparian water rights, including non-diversionary stock water.
- Lack of data indicating water usage can also be a consideration in determining water availability, if the department cannot ascertain the extent to which existing rights are consistently utilized and cannot affirmatively find that water is available for further appropriation.

Legal Availability

To determine whether water to be legally available for appropriation, the following factors are considered:

- Regional water management plans – which may specifically close certain water bodies to further appropriation.
- Existing rights – which may already appropriate physically available water.

Consideration of Protests and Comments
No protests were filed against this application.

Conclusions

In conclusion,

- Water is physically available at the quantities sufficient to meet project demand. When combined with the proposed mitigation measures, water is legally available under the provisions of WAC 173-539A.
- RCW 90.54.020 recognizes domestic and irrigation uses as beneficial uses of water.
- Approval of the proposed appropriation will not result in impairment of existing water rights.
- Approval of the proposed appropriation is not detrimental to the public interest.

RECOMMENDATIONS

Based on the above investigation and conclusions, I recommend that this request for a water right be approved in the amounts and within the limitations listed below and subject to the provisions listed above.

Purpose of Use and Authorized Quantities

The amount of water recommended is a maximum limit and the water user may only use that amount of water within the specified limit that is reasonable and beneficial:

- 4.48 gpm.
- 0.414 ac-ft/yr (0.392 ac-ft/yr for single domestic and 0.022 ac-ft/yr for irrigation).
- Continuous indoor single domestic for one residence.
- Seasonal irrigation of up to 0.011 acre of lawn and garden from June 1 through September 30 annually.

Point of Withdrawal

One well (APG-193) approximately 1520 feet west and 1860 feet south from the northeast corner of Section 7, within the SW¼NE¼ of Section 7, Township 19 N., Range 15 E.W.M.

Place of Use

As described on **Page 2** of this Report of Examination

Candis L. Graff, Report Writer

Date January 27, 2014

If you need this document in a format for the visually impaired, call the Water Resources Program at 509-575-2490. Persons with hearing loss can call 711 for Washington Relay Service. Persons with a speech disability can call 877-833-6341.

- Fisheries and other instream uses (e.g., recreation and navigation). Instream needs, including instream and base flows set by regulation. Water is not available for out of stream uses where further reducing the flow level of surface water would be detrimental to existing fishery resources.
- The Department may deny an application for a new appropriation in a drainage where adjudicated rights exceed the average low flow supply, even if the prior rights are not presently being exercised. Water would not become available for appropriation until existing rights are relinquished for non-use by state proceedings.

Hydrologic/Hydrogeologic Evaluation

The following hydrologic/hydrogeologic excerpts were prepared in a Technical Memorandum dated July 5, 2011, for a previous proposal and modified on November 15, 2013, for this proposal by licensed hydrogeologist, Anna Hoselton and reviewed by Stuart Luttrell, supervisor and licensed hydrogeologist, and seeks to address, by way of discussion, analysis, and evaluation, physical availability and potential for impairment to existing water users.

Water Availability

Project Area Geologic/Hydrogeology, Water Availability, Impairment, and issues related to Spex Arth Creek for well APG193 was previously evaluated for physical water availability and potential for impairment in the July 5th, 2011, Technical Memorandum written for Permit File No. G4-35495 for Eli Shoval. Permitting conclusions found in the previous evaluation are directly applicable to the current application seeking to use well APG193 and are summarized below to include the current application:

Based on area topography, groundwater levels and flow direction calculations, groundwater captured by the subject well is most likely to reduce the Sub Surface Run Off (SSRO). Based on the hydrogeologic setting, well data, and the simplified water balance, **groundwater is physically available for the project**. Water availability, however, also includes policy, management and legal considerations and is ultimately a permitting/management decision that is, in part, based on the above information.

Impairment

The additional withdrawal of 0.414 af/yr per at existing well APG193 for Application No. G4-35634 will result in additional drawdown of less than 1 ft in the vicinity of the well, but is **not anticipated to result in impairing effects on existing rights**.

Beneficial Use

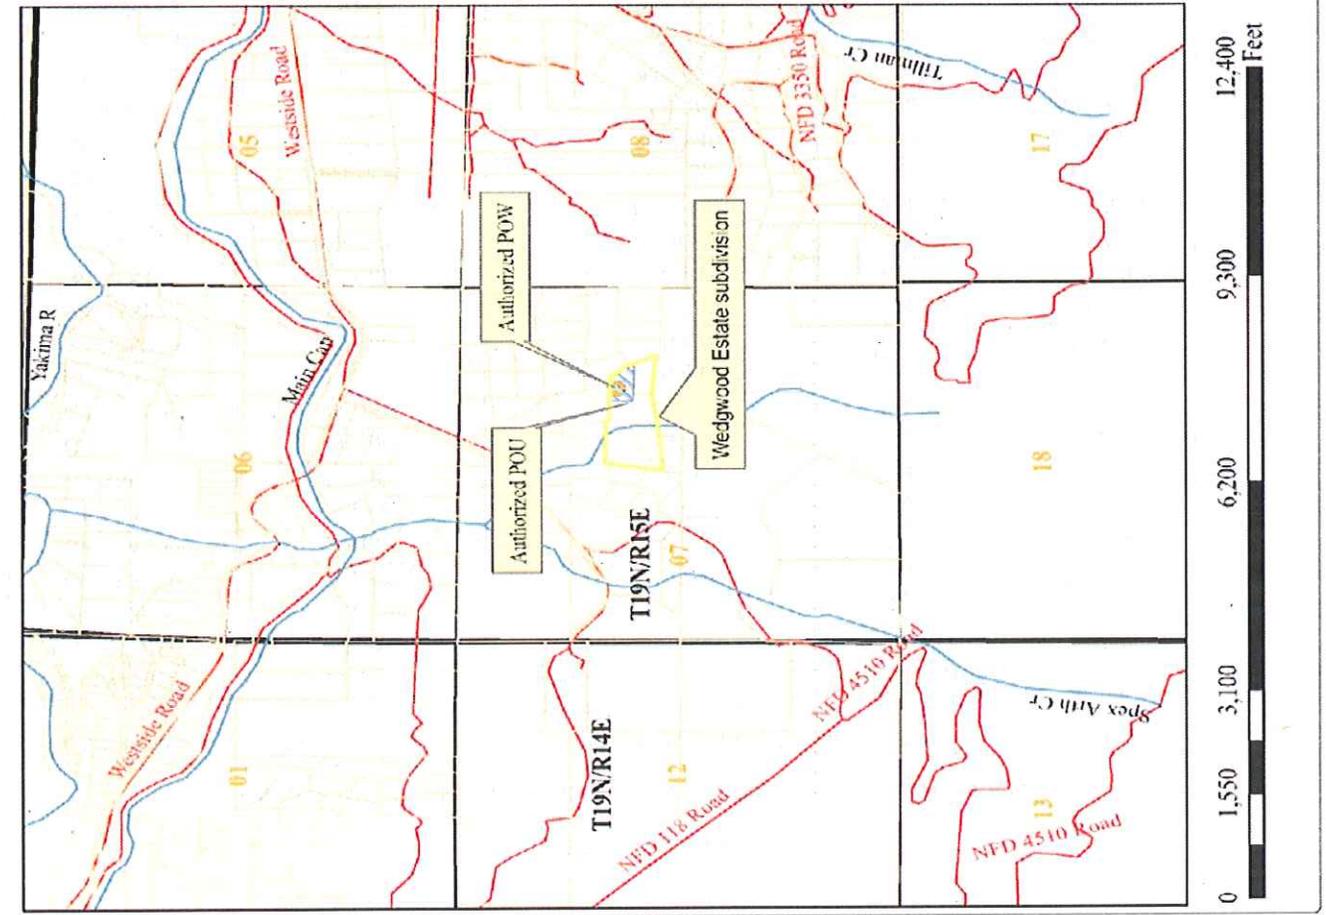

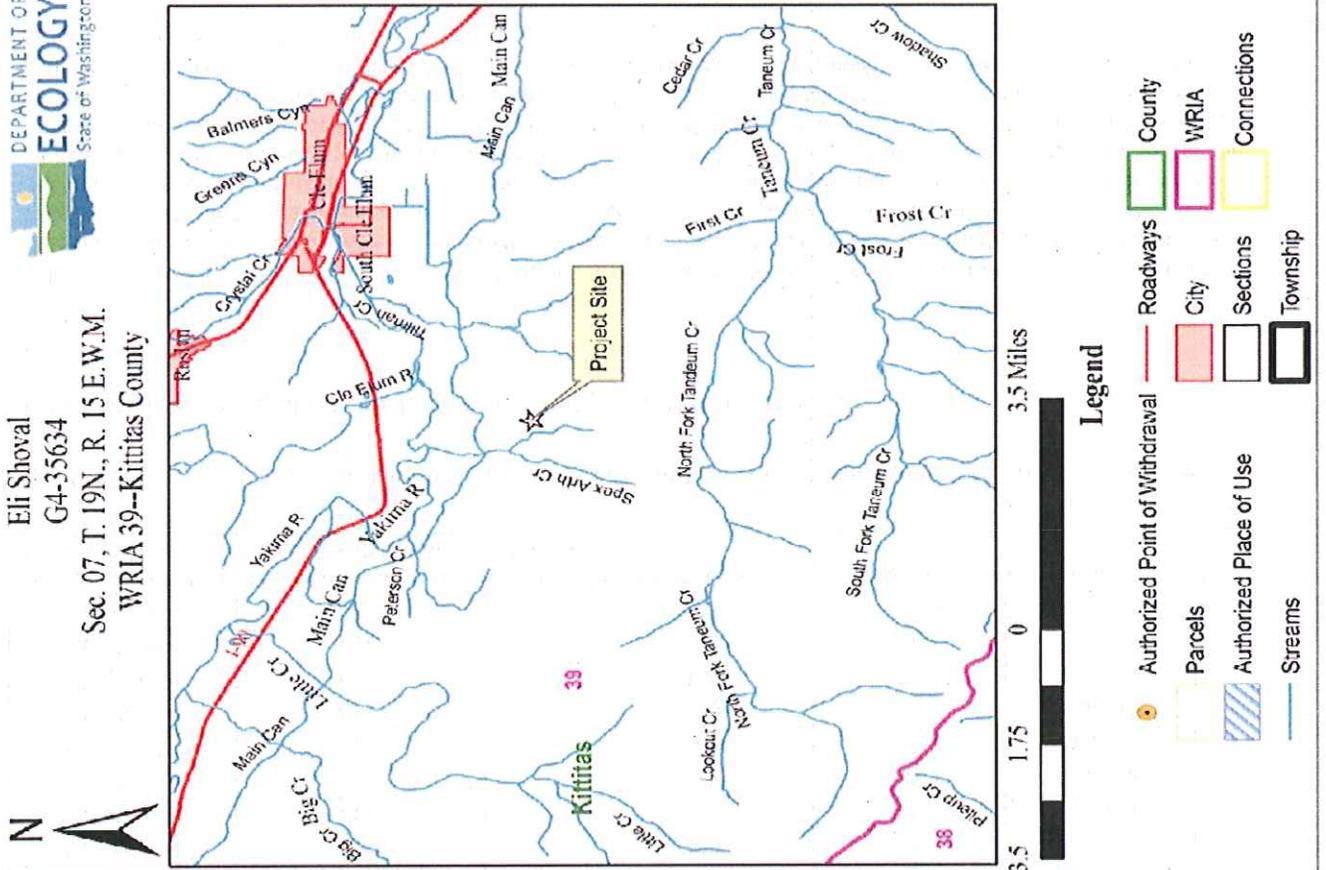

The proposed uses of water are defined in statute as beneficial uses (RCW 90.54.020(1)).

Public Interest Considerations

When investigating a water right application, Ecology is required to consider whether the proposal is detrimental to the public interest. Ecology must consider how the proposal will affect an array of factors such as wildlife habitat, recreation, water quality, and human health. The environmental resources and other natural values associated with the area were taken into account during the consideration of this application.

Definitions: WBN=Water-Budget-Neutral, DM=Domestic Multiple, DS=Domestic Single, DG=Domestic General, IR=Irrigation, ST=Stock water, SR=Storage, CFO=Conditional Final Order.

G4-108735CL and G4-53368CL are short-form claims and represent permit-exempt groundwater uses.

G4-35435 is a new application. Ecology has not processed this request.

⁴ The above referenced claims were filed under Claims Registration Act, RCW 90.14. The intent of this act was to document those uses of surface water in existence prior to the adoption of the State Surface Water Code, RCW 90.03, which was adopted in 1917, and those uses of ground water in existence prior to the adoption of the State Ground Water Code, RCW 90.44, which was adopted in 1945. Since each code adoption, the only means of acquiring a water right within the state is by filing for, and receiving, a permit from Ecology or one of its predecessors or by establishing a right under the "exemption" under the Ground Water Code RCW 90.44.050. Ecology recognizes that the final determination of the validity and extent associated with a claim registered in accordance with RCW 90.14 ultimately lies with the Superior Court through the general adjudication process provided for by RCWs 90.03.110 through 90.03.240. Ecology does, however, recognize that water use may be occurring under these claims.

G4-35539P, G4-35540P, G4-35556P, G4-35581P, G4-35460P, and G4-35495P authorize single domestic use with incidental lawn and garden.

G4-35250P, G4-35526P, and G4-35577P authorize use for domestic multiple and incidental irrigation.

G4-35630(A) and G4-35630(B) are "general" permit requests, which if approved, would authorize up to a total of 15 wells for 20 residential connections between the two permits.

G4-28206C is a ground water certificate for the purpose of domestic single with one well.

Surface Water Certificate Nos. S4-84638-J and S4-84650-J are owned by the United States Bureau of Reclamation and are authorized to use water for storage for flood-control purposes covering the entire Yakima Basin in the authorized place-of-use.
