

State of Washington  
**REPORT OF EXAMINATION  
FOR WATER RIGHT CHANGE**

Added Point of Diversion

**PRIORITY DATE**  
The year 1894  
(Class 32)

**WATER RIGHT NUMBER**  
Walla Walla River Adjudicated Surface Water Certificate No. 462  
together with Change Report of Examination dated 8/5/2005 and  
Trust Report of Examination dated 8/2/2006

**MAILING ADDRESS**  
Quentin Schwenke  
3422 Powerline Road  
Walla Walla, WA 99362

**Total Quantity Authorized for Diversion**

MAXIMUM DIVERSION RATE	UNITS	ANNUAL QUANTITY (AF/YR)
0.19	CFS	43.897

**Purpose**

PURPOSE	DIVERSION RATE	ANNUAL QUANTITY (AF/YR)
Irrigation	0.127 CFS from 04/01 to 07/01	43.897
	0.095 CFS from 07/01 to 10/01	
	0.190 CFS from 10/1 to 04/01*	

\*when allowed in accordance with the Walla Walla Adjudication

**Prior to 10/31/2029**, the expiration date of the trusted water (see ROE dated 8/2/2006), use shall not exceed 40 acre-feet, 0.085 cfs in March (when allowed under adjudication), 0.127 cfs in April - June, 0.095 cfs in July - September, 0.190 cfs in October - February (when allowed under adjudication), for the irrigation of 9.5 acres.

**Place of Use (See Attached Map)**

PARCELS (NOT LISTED FOR SERVICE AREAS)

350729210004, 350732220001

**LEGAL DESCRIPTION OF AUTHORIZED PLACE OF USE**

That portion of Gov't Lot 1, Section 32 T. 7 N., R. 35 E.W.M. and the W½ of Section 29, T. 7 N., R. 35 E.W.M., all lying northerly of old State Highway 12 EXCEPTING THEREFROM; however, the right-of-way of new State Highway 12 over and across said premises. ALSO EXCEPTING THEREFROM; the following described tract: Beginning at the NW corner of Section 32, T. 7 N., R. 35, and run thence South 0°11'21" W, along the West line of said Section, a distance of 215.57 feet to a point in the Northerly right of way of SR 12, thence N 68°47'00" E, along said Northerly right of way, 1455.80 feet to the True Point of Beginning for this description; thence continued N 68°47'00" E, along said right of way, 692.51 feet; thence N 21°13'00" W, 629.11 feet; thence S 73° 21'58" W, 391.03 feet, thence S 67°41'39" W, 302.78 feet; thence S 21°13'00" E, 654.60 feet to the true point of beginning.

**Proposed Works**

Pumpstation, mainlines, two pivots and handline irrigation system

**Development Schedule**

BEGIN PROJECT	COMPLETE PROJECT	PUT WATER TO FULL USE
Begun	Completed	In use

**Measurement of Water Use**

How often must water use be measured?	Weekly
How often must water use data be reported to Ecology?	Annually (Jan 31)
What volume should be reported?	Total Annual Volume
What rate should be reported?	Annual Peak Rate of Withdrawal (cfs)

**Provisions**

**Prior to 10/31/2029**, the expiration date of the trusted water, use under Walla Walla Adjudicated Certificate No. 462 shall not exceed 40 acre-feet, 0.085 cfs in March (when allowed under the adjudication), 0.127 cfs in April - June, 0.095 cfs in July - September, 0.190 cfs in October – February (when allowed under the adjudication), for the irrigation of 9.5 acres. This water use shall be within the place of use described on Page 2 of this Report of Examination.

**After 10/31/2029**, the expiration date of the trusted water, use under Walla Walla Adjudicated Certificate No. 462 shall not exceed 43.897 acre-feet; 0.127 cfs from April 1 to July 1, 0.095 cfs from July 1 to October 1, 0.190 cfs from October 1 to April 1 (when allowed under the adjudication), for the irrigation of 9.5 acres. This water use shall be within the place of use described on Page 2 of this Report of Examination.

**Prior to 10/31/2029**, the expiration date of the trusted water, use under Surface Water Right Certificate Nos. 8611, 7832 and WWAC 462 shall not exceed 254.229 acre-feet of water for the seasonal irrigation of 139.9 acres for Quentin Schwenke’s portion of the water rights. This water use shall be within the place of use described on Page 2 of this Report of Examination.

**Prior to 10/31/2029**, the expiration date of the trusted water, use under Surface Water Right Certificate Nos. 8611, 7832 and WWAC 462 shall not exceed 254.229 acre-feet of water for the seasonal irrigation of 139.9 acres for Quentin Schwenke's portion of the water rights. This water use shall be within the place of use described on Page 2 of this Report of Examination.

**After 10/31/2029**, the expiration date of the trusted water, Surface Water Right Certificate Nos. 8611, 7832 and WWAC 462 shall not exceed 563.897 acre-feet of water for the seasonal irrigation of 139.5 acres for Quentin Schwenke's portion of the water rights. This water use shall be within the place of use described on Page 2 of this Report of Examination.

**After 10/31/2029**, the expiration date of the trusted water, the Department of Ecology (Ecology) must have verification of your water use before issuing a *Superseding Certificate of Water Right*. At which time you will be required to hire a certified water right examiner (CWRE) to perform a field inspection of your water use and prepare a *Proof Report of Examination and Recommendation Summary*. You can find a list of certified water right examiners at <http://www.ecy.wa.gov/programs/wr/rights/cwrep.html> or you may call the CWRE Coordinator at (360) 407-6000 and request a copy of the list be mailed to you.

Quentin Schwenke's portion of Water Right Certificate Nos. G3-00339C, G3-01029C, G3-22110C, 462, 7832 and 8611, shall not exceed 264.5 acres of irrigation. This water use is within the place of use described on Page 2 of this Report of Examination.

When the supply of water for irrigation purposes from April 1 to October 1 is insufficient in the Walla Walla Valley to fill any right contained in the foregoing schedule, the owner of such right is entitled to divert water during the period of October 1 to April 1.

Department of Ecology personnel, upon presentation of proper credentials, will have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.

#### **Measurements, Monitoring, Metering and Reporting**

An approved measuring device must be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173, which describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

Water use data shall be recorded weekly and maintained by the property owner for a minimum of five years. The maximum rate of withdrawal and the annual total volume shall be submitted to the Department of Ecology by January 31st of each calendar year. Recorded water use data shall be submitted to the Eastern Regional Office.

#### **Department of Fish and Wildlife Requirement(s)**

The intake(s) must be screened in accordance with Department of Fish and Wildlife screening criteria (pursuant to RCW 77.57.010, RCW 77.57.070, and RCW 77.57.040). Contact the Department of Fish and Wildlife, 600 Capitol Way N, Olympia, WA 98501-1091. Attention: Habitat Program, Phone: (360) 902-2534 if you have questions about screening criteria. <http://wdfw.wa.gov/about/contact/>

**INVESTIGATOR'S REPORT**

Dan Tolleson, Department of Ecology

Water Right Control Number CS3-\*28462J@3

Walla Walla River Adjudicated Surface Water Certificate No. 462

**BACKGROUND**

This report serves as the written findings of fact concerning Water Right Application Number CS3-\*28462J@3 under Walla Walla River Adjudicated Surface Water Certificate No. 462 (WWAC 462).

**EXISTING Water Right Attributes (Schwenke Portion of Right, with 2005 and 2006 ROEs)**

<b>Name on Water Right:</b>	Quentin Schwenke
<b>Priority Date:</b>	The year 1894 (Class 32)
<b>Place of Use:</b>	That portion of Gov't Lot 1, Section 32 T. 7 N., R. 35 E.W.M., lying northerly of State Highway 12. ALSO; The W½ of Section 29, T. 7 N., R. 35 E.W.M. EXCEPTING THEREFROM; however, the right-of-way of State Highway 12 over and across said premises. ALSO EXCEPTING THEREFROM; the following described tract: Beginning at the NW corner of Section 32, T. 7 N., R. 35, and run thence South 0°11'21" W, along the West line of said Section, a distance of 215.57 feet to a point in the Northerly right of way of SR 12, thence N 68°47'00" E, along said Northerly right of way, 1455.80 feet to the True Point of Beginning for this description; thence continued N 68°47'00" E, along said right of way, 692.51 feet; thence N 21°13'00" W, 629.11 feet; thence S 73° 21'58" W, 391.03 feet, thence S 67°41'39" W, 302.78 feet; thence S 21°13'00" E, 654.60 feet to the true point of beginning. (Stiller 10 acres)

County	Waterbody	Tributary To	WRIA

**Legal Requirements for Requested Change**

The following is a list of requirements that must be met prior to authorizing the proposed change.

*Public Notice*

RCW 90.03.280 requires that notice of a water right application be published once a week, for two consecutive weeks, in a newspaper of general circulation in the county or counties where the water is to be stored, diverted and used. Notice of this application was published in the Waitsburg Times on August 29 and September 5, 2013. No protests were received regarding this notice.

*Consultation with the Department of Fish and Wildlife*

The Department must give notice to the Department of Fish and Wildlife (WDFW) of applications to divert, withdraw or store water. A letter was received from WDFW February 13, 2015, that indicated they do not oppose the change since it will not have any additional impacts. The project is subject to state Hydraulic Code (Chapter 77.55 RCW) and fish screening statutes (RCW 77.57.010, RCW 77.57.040 and RCW 77.57.070).

### *State Environmental Policy Act (SEPA)*

A water right application is subject to a SEPA threshold determination (i.e., an evaluation whether there are likely to be significant adverse environmental impacts) if any one of the following conditions are met.

- (a) It is a surface water right application for more than 1 cubic foot per second, unless that project is for agricultural irrigation, in which case the threshold is increased to 50 cubic feet per second, so long as that irrigation project will not receive public subsidies;
- (b) It is a groundwater right application for more than 2,250 gallons per minute;
- (c) It is an application that, in combination with other water right applications for the same project, collectively exceed the amounts above;
- (d) It is a part of a larger proposal that is subject to SEPA for other reasons (e.g., the need to obtain other permits that are not exempt from SEPA);
- (e) It is part of a series of exempt actions that, together, trigger the need to do a threshold determination, as defined under WAC 197-11-305.

Because this application is part of a larger project that entails the withdrawal of more than one cfs of surface water and the project receives public funding, it is subject to SEPA. A final Determination of Non-Significance was issued by the Department of Ecology on February 5, 2016, stating that no environmental impact statement is required.

### *Water Resources Statutes and Case Law*

RCW 90.03.380(1) states that a water right that has been put to beneficial use may be changed. The point of diversion, place of use, and purpose of use may be changed if it would not result in harm or injury to other water rights.

The Washington Supreme Court has held that Ecology, when processing an application for change to a water right, is required to make a tentative determination of extent and validity of the claim or right. This is necessary to establish whether the claim or right is eligible for change. *R.D. Merrill v. PCHB* and *Okanogan Wilderness League v. Town of Twisp*.

## **INVESTIGATION**

---

In considering the proposed application, the investigation included, but was not limited to, research and review of: (1) appropriate rules and statutes; (2) other water rights, permits, and claims; (3) USGS topographic maps and aerial photographs; (4) existing and proposed diversion, irrigation system, and the place of use; (5) Chapter 173-532 WAC Water Resources Program for the Walla Walla River Basin, WRIA 32 and Watershed Planning; (6) State of Washington Irrigation Guide (Natural Resources Conservation Service 1997); and (7) discussions with Department of Ecology regional program staff.

A field investigation was conducted by Dan Tolleson on August 3, 2015. The project is located two miles west of the City of College Place, Washington. The water right is located in the Walla Walla Basin, which is managed under Chapter 173-532 WAC Water Resources Program for the Walla Walla River Basin, WRIA 32.

The place of use authorized under this water right is primarily located within the W½ of Section 29, with a smaller portion in the NW¼ of Section 32, all within T. 7 N., R. 35 E.W.M. This place of use is bisected by both old and new Highway 12. The majority of the place of use located north of old Highway 12 is owned by Quentin Schwenke and is the only portion of the project proposed for change under this application. Quentin Schwenke’s portion of the place of use is irrigated farm land that has an old pond site known as Stiller Pond. The project is irrigated by a combination of a full sweep quarter section pivot with an end gun, a small partial sweep pivot with end guns and handlines.

This water right originally utilized a gravity feed ditch to divert water from Mill Creek into Stiller Pond. The stored pond water was in turn used for irrigation under this right. This pond is no longer used for the storage of irrigation water, but is now an aquifer recharge basin. The proposed point of diversion is a recently redesigned pump station that is currently used to provide water for several irrigation rights, and the aquifer recharge project. The pumpstation consists of a centrifugal pump with a flow meter and fish screen.

### History of Water Use

---

Walla Walla River Adjudicated Surface Water Certificate No. 462 was issued October 22, 1929 as a primary water right. The priority date of the water right is the year 1894, which is a class 32 under the adjudication. Although this is a primary right, water is not always available due to its location and priority date on Mill Creek. In recent years, applications for change were approved, under this water right. They documented use under this water right and how it was split up among the various land owners. The decisions are authorized in amended Change Report of Examination dated 8/5/2005 and Trust Report of Examination dated 8/2/2006. Quentin Schwenke’s portions are summarized below.

#### **WWAC 462 together with the 2005 Change Report of Examination (Total Schwenke Portion)**

Certificate	Acres Primary	Qi Maximum	Season	Qa	Af per acre	Source
WWAC 462	9.5	0.19 cfs	1/1 - 12/31	47.5	5	Mill Creek

#### **WWAC 462 together with the 2006 Trust Report of Examination (Portion in Trust)**

Certificate	Qa Trust	Qi March
WWAC 462	3.897	0.105 cfs

The agreement to place water into trust is temporary and expires 10/29/2029.

The remainder of the right not owned by Quentin Schwenke is described in Change Report of Examination dated 6/30/2005 and amended Change Report of Examination dated 8/5/2005. In addition, a small portion of the right described under the original certificate remains unchanged. These other portions of the water right will not be addressed in this report.

Aerial photographs were used to help verify the extent of development, historical and beneficial use of this water right. The authorized place of use owned by Quentin Schwenke in 2005-2006 when the last changes were authorized was approximately 294 acres. This place of use was reduced to 274.43 acres

when new Highway 12 was constructed through the project in 2009. According to the Assessor's Office this reduced project area has 9.9 acres of waste, which is the aquifer recharge pond site (Stiller Pond). This means that there are only 264.5 acres of irrigable land within the place of use. The 9.5 acres of irrigation authorized under this right has been consistently used within portions of the place of use, since the last changes were approved. In recent years, this right has been utilized to provide water for the small pivot located south of new Highway 12, when water is available.

The construction of new state Highway 12, through the middle of the project, has made the authorized legal description of this right incorrect. Therefore, the legal description shall be modified to reflect the changes for Quentin Schwenke's portion of the right.

Instantaneous quantities currently authorized under this right are limited by the temporary trust authorization to the following: 0.085 cfs in March, 0.127 cfs in April - June, 0.095 cfs in July - September, 0.190 cfs in October – February. The remaining instantaneous quantities are in good standing and available for use once the trust expires on 10/31/2029. It is estimated that these reduced instantaneous quantities have been put to full use since the 2006 decisions were approved. The proposed pumping station can produce up to 2.6 cfs (1189 gpm). This is significantly more water than is authorized under this right, which is a result of the pumpstation being used as a source for multiple rights. Since this system has multiple water rights, water diversion will need to be coordinated so as not to exceed the quantities authorized under each right. Water use beyond what is authorized may be subject to fines.

**Instantaneous Quantities (The Portion not put into Trust)**

Certificate	Qi March	Qi April- June	Qi July-Sept	Qi October – February
WWAC 462	0.085	0.127	0.095	0.190

This schedule expires 10/31/2029. After that date, Quentin Schwenke's portion of the right shall revert back to the following: 0.127 cfs from April 1 to July 1; 0.095 cfs from July 1 to October 1; and 0.190 cfs from October 1 to April 1 when allowed under the adjudication.

The maximum authorized water duty of this certificate is 5 acre-feet per year, per acre. According the adjudication 4.2 acre-feet per acre is the maximum allowed when water is available during the regular irrigation season, which is from April 1 to October 1. If a full quantity of water is not available during the regular irrigation season, then water may be diverted from October 1 to April 1 up to a maximum of 5 acre-feet per acre. The result of the previous change decision in 2005 is that the entire 5 acre-feet per acre were historically put to use, but included ditch loss which was not specifically addressed in the adjudication. The result of the previous decision in 2006 is that only 4.59 acre-feet per acre or a total of 43.625 acre-feet total are available for irrigation until the trust ends on 10/31/2029. The remaining 3.897 acre-feet total are in trust and remain in good standing. The highest water duty crops used under this right since a portion was put into trust in 2006, was alfalfa. The State of Washington Irrigation Guide (WA210-VI-WAIG) states that an estimated 3.2 acre-feet, per acre, is required for alfalfa in the Walla Walla area. At a 75% efficiency rate of application, the maximum water duty, for the crop listed above is 4.2 acre-feet per year, per acre. Therefore, an allocation of 40 acre-feet, per year, for the irrigation of 9.5 acres is appurtenant to Quentin Schwenke's lands. The total including the trusted

portion of the right, which remains in good standing is 43.897 acre-feet for the irrigation of 9.5 acres. The remaining unused 3.6 acre-feet of annual quantity has been relinquished for non-use.

### Proposed Use

Quentin Schwenke proposes to change the point of diversion to an existing pumpstation under his portion of Walla Walla Adjudicated Certificate No. 462. This includes the portion of the right put into temporary trust for instream flows, which expires 10/31/2029.

### Other Rights Appurtenant to the Place of Use

A review of Ecology records was conducted for existing water right certificates, permits, and claims appurtenant to this project. The search focused primarily on Sections 29 and 32 within T. 7 N., R. 35 E.W.M. This review shows five water rights, one preliminary permit and one temporary permit appurtenant to the authorized place of use. Three of these water rights have portions placed into trust. The overlapping rights and permits are as follows:

### Irrigation Water Rights Appurtenant to the Schwenke Project

Certificate	Acres Primary	Acres Non-additive	Qi Maximum	Season	Qa	Source
WWAC 462	9.5	--	0.19 cfs	1/1 - 12/31	47.5	Mill Creek
SWC 7832	130	--	1.86 cfs	10/1 - 6/15	520	Mill Creek
SWC 8611	--	139.5	0.914	4/1 - 5/15	55.8	Mill Creek
G3-00339C	138	139.5	327 gpm	1/1 - 12/31	635.5 <sup>B</sup>	Gravel wells
G3-01029C	9	137	228 gpm	1/1 - 12/31	362 <sup>C</sup>	Gravel wells
G3-22110C	--	40	180 gpm	1/1 - 12/31	186	Gravel wells
Total	<sup>A</sup>				<sup>D</sup>	

<sup>A</sup> The place of use was reduced from 294 to 274.43 acres when new Highway 12 was constructed through the authorized place of use in 2009. The Department of Transportation has no interest in these rights. According to the Assessor's Office, there are only 264.5 acres of irrigable land within the place of use. This means that some portion of the ground water rights appear to be relinquished.

<sup>B</sup> Qa cannot be pumped in a year with the authorized Qi (527.5 af is the max that can be pump in a year)

<sup>C</sup> Must be pumped almost 24/7 to reach the authorized annual quantity each year.

<sup>D</sup> According to Amendment dated August 5, 2005, Ground Water Certificates G3-00339C, G3-01029C and G3-22110C are limited to a maximum of 3.78 acre-feet per acre of irrigation.

## Irrigation Water Rights in Trust Appurtenant to Schwenke portion of the Project

Certificate	Qa Trust	Qi March	Qi April	Qi May	Qi October
WWAC 462	3.897	0.105 cfs	--	--	--
SWC 7832	305.771	1.581 cfs	1.171 cfs	0.750 cfs	1.487 cfs
SWC 8611	50.499	--	0.777 cfs	--	--
Total	360.167				

The trusted quantities of the above listed rights are in good standing but not available until the trust expires on 10/31/2029.

## Other Water Rights Appurtenant to the Schwenke Project

Temporary Permit S3-30680, together with the Preliminary Permit under Application No. S3-30674 were issued in conjunction to determine the feasibility of a proposed permanent Aquifer Storage and Recover (ASR) project. The ASR project currently authorizes water diversion from Mill Creek in the winter and spring months from the pump station proposed under this change application. The water is pumped into a recharge basin, which is the old pond site referred to as "Stiller Pond", located within the place of use described under this change application. The intent of the project is to recharge the shallow alluvial aquifer and create an environmental enhancement. Upon completion of operation and data collection, Ecology will make a permanent decision on Application No. S3-30674. No long term use is anticipated under Temporary Permit S3-30680, since its only purpose is to supply water to Preliminary Permit S3-30674 for testing purposes.

*The validity and extent of above listed overlapping water rights are not determined in this report.*

## Impairment Considerations

"Impair" or "impairment" means to 1) adversely impact the physical availability of water for a beneficial use that is entitled to protection, not including earlier filed applications (HB 1832); and/or 2) to prevent the beneficial use of the water to which one is entitled; and/or 3) to adversely affect the flow of a surface water course at a time when the flows are at or below instream flow levels established by rule (POL-1200); and/or 4) degrade the quality of the source to the point that water is unsuitable for use by existing water right holders (WAC 173-150). Demonstration of impairment would require evidence of a substantial and lasting or frequent impact reflecting such conditions.

Quentin Schwenke proposes to move the authorized point of diversion downstream approximately 800 feet to an existing pump station. The proposed pump station has been used in this general location for the last six years without any complaints. There are no significant changes in the stream or diversions of water between the originally authorized ditch and proposed pumpstation. Therefore, no impairment is anticipated by changing the point of diversion downstream. The proposed change will not increase the amount of water withdrawn from the Mill Creek nor will it increase or enlarge the right.

## Conclusions

---

In accordance with Chapters 90.03, approval of this application to change the point of diversion as granted under Walla Walla Adjudicated Surface Water Certificate No. 462 will not enlarge the quantity of water historically authorized, nor will it impair existing rights provided the terms and conditions above are followed.

The amount of water recommended is a maximum limit that shall not be exceeded, and the water user may only use that amount of water within the specified limit that is reasonable and beneficial. This authorization does not increase in any way the original amounts authorized.

## RECOMMENDATIONS

---

Based on the above investigation and conclusions, I recommend that this request for a water right be approved in the amounts and within the limitations listed below and subject to the provisions listed above.

### *Purpose of Use and Authorized Quantities*

The amount of water recommended is a maximum limit and the water user may only use that amount of water within the specified limit that is reasonable and beneficial:

Up to 0.19 cubic feet per second (as described on Page 1 of this Report of Examination)  
43.897 acre-feet (3.897 acre-feet of total in trust until 10/31/2029)  
Irrigation of 9.5 acres, from 1/1 – 12/31 (when allowed under the adjudication)

### Point of Diversion

Mill Creek Pumpstation - SE $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 28, Township 7 North, Range 35 E.W.M.

### Place of Use

As described on Page 2 of this Report of Examination.
