LEGAL DESCRIPTION OF PROPERTY ON WHICH WATER IS TO BE USED

62 acres of irrigation within the NW1/4 SW1/4 and SW1/4 SW1/4 and SE1/4 SW1/4 of Section 19; and the NE1/4 NW1/4 of Section 30; all within T.35N, R.21 E.W.M.

DESCRIPTION OF PROPOSED WORKS

The project proposes to change the point of diversion from a surface water diversion on a side channel pond of the Methow River to a well located within the NE1/4 NW1/4 of Section 30; T35N, R21E.W.M.
The full quantity of the water right will be used for the irrigation of 62 acres within the place of use stated on this permit.
No portion of the water right will remain in trust for instream flow.

DEVELOPMENT SCHEDULE

BEGIN PROJECT BY THIS DATE:	COMPLETE PROJECT BY THIS DATE:	WATER PUT TO FULL USE BY THIS DATE:
04/01/2013	04/01/2015	11/15/2017

PROVISIONS

This temporary permit achieves the changes requested previousiy by water right change application CS4-SWC1175@3, which has not yet been processed:

- Water previously put into trust for instream flow under CS4-SWC1175@1 is hereby removed from instream flow and put back into the purpose of irrigation.
- The point of diversion which was previously changed from the Methow River to a side channel pond of the Methow River under CS4-SWC1175@1 is hereby changed to withdrawal from a well.

This Temporary Permit will remain in effect for a maximum period of 5 years from date of issue, or until the permanent change requested under CS4-SWC1175@3 is processed, whichever occurs first.

The proposed well will be constructed in a manner so as to withdraw water only from the alluvial aquifer of the Methow River.

All wells constructed in the state shall meet the "Minimum Standards for the Construction and Maintenance of Wells" (WAC 173-160) and "Water Well Construction" (RCW 18.104). In general, wells shall be located at least 100 feet from sources of contamination and at least 1,000 feet of the boundary of a solid waste landfill. Any well which is unusable, abandoned, or is an environmental, safety, or public health hazard shall be decommissioned.

All wells shall be tagged with a Department of Ecology unique well identification number. If you have an existing well and it does not have a tag, please contact the well-drilling coordinator at the regional Department of Ecology office issuing this decision. This tag shall remain attached to the well. If you are required to submit water measuring reports, reference this tag number.

Required installation and maintenance of an access port as described in WAC 173-160- 291(3).

Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.

An approved measuring device must be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173, which describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

Recorded water use data shall be submitted via the Internet. To set up an Internet reporting account, contact the Regional Office. If you do not have Internet access, you can still submit hard copies by contacting the Regional Office for forms to submit your water use data.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Given under my hand the seal of this office at Yakima, Washington, this 25 *day of March 2013.*
