Renton WA 98057

Re: Water Right Nos. G1-24781P, G1-24782P, G1-25396P, and G1-25397P

Dear Ms. Hornsby:

In response to your request, you are hereby granted an extension to put the water to full beneficial use for the reason below:

You have not been able to perfect the water use because of a temporary intertie with the City of Seattle.

The new deadline to submit your *Proof of Appropriation of Water* is **September 30, 2021**.

The following provisions shall be removed from Renton's four water right permits, G1-24781P, G1-24782P, G1-25396P and G1-25397P

The USGS gage 12119000 (located in downtown Renton) shall be permanently maintained plus Renton shall establish and permanently maintain at least two additional upstream gaging stations- one in the Narrows area downstream of the golf course and another gaging station upstream of the influence of the Maplewood Golf Course aquifers.

Renton shall notify the Department of Ecology NWRO Water Resources whenever a decrease in Cedar River flows is recorded between the upstream gage and any subsequent downstream gage.

Prior to use of waters from the new wells, the gaging stations shall be in operation and an interim management plan detailing procedures for monitoring pumping and assuring that flows in the Cedar River are not decreased from pumping shall be submitted to NWRO Water Resources and approved.

A long term management plan shall be submitted to NWRO Water Resources after 3 years of operating under the interim plan. The final management plan shall be approved by Water Resources prior to issuance of a Certificate of Water Right.

All other provisions on the permits shall remain in effect and the above removed provisions shall be replaced with the following provisions:

The USGS gage 12119000 (located in downtown Renton) shall be permanently maintained.

Prior to using the instantaneous portion of this water right as additive to existing rights, a management plan shall be submitted to NWRO Water Resources and approved. The management plan shall provide detailed procedures for monitoring, pumping, and assuring that instream flows in the Cedar River will not be impaired by pumping.

You have a right to appeal this action to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this document. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal, you must do the following within 30 days of the date of receipt of this document:

- File your appeal and a copy of this document with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this document on Ecology in paper form - by mail or in person. (See addresses below.) Email is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
