

**Proposed Changes to:
Mitigation Suitability of the Suncadia
(Lamb and Anderson) Trust Water Rights**

Legend

- Likely Suitable
- Need Additional Information
- Unsuitable
- Stream reaches where impacts to stream flow would not create fish or fish habitat concerns
- Designates surface water drainage areas for stream reaches identified by WDFW and YIN as not having fish or fish habitat concerns. (NOTE: Hydrogeologic analysis is needed to confirm that impact due to a proposed withdrawal in the area would be to the local surface water feature(s)).

- 1 - Unnamed stream drainages near E shoreline of Lake Kachess
- 2 - Unnamed tributary drainage to Cle Elum River (near Section 24, T20N, R14EWM)
- 3 - Unnamed tributary drainage to Cle Elum River (near Sections 1, 12 & 13, T20N, R14EWM)
- 4 - Greens Canyon, Curry Canyon, and Balmers Canyon drainages
- 5 - Thornton Creek drainage
