

WATER TRANSFER WORKING GROUP PROJECT DESCRIPTION FORM

APPLICATION NO. CS4-02276CTCL@1	WATER RIGHT / COURT CLAIM NO. 2276	DATE OF APPLICATION April 21, 2006
APPLICANT NAME Frank W. Payne	CONTACT NAME Breean Zimmerman, Ecology	TELEPHONE NO. (509) 454-7647
WATER RIGHT HOLDER'S NAME (if different) U.S. Bureau of Reclamation (Warren Act Contract)		EMAIL
WATER SOURCE: Yakima River	PRIORITY DATE May 10, 1905	PERIOD OF USE: May 1 – September 15
HISTORIC USES		
INSTANTANEOUS QUANTITY: 0.8 cfs	ANNUAL QUANTITY: 160 acre-feet/yr	CROP: Alfalfa and orchard grass
PLACE OF USE: SW ¹ / ₄ NW ¹ / ₄ of Section 14, T. 17 N., R. 18 E.W.M.	PURPOSE(S) OF USE: Irrigation of 40 acres	IRRIGATION METHOD: Wheel Lines

WATER TRANSFER WORKING GROUP PROJECT DESCRIPTION FORM

PROPOSED USES		
INSTANTANEOUS QUANTITY: 0.8 cfs	ANNUAL QUANTITY: 160 acre-ft/yr	CROP: Alfalfa and orchard grass
PLACE OF USE: SW ¹ / ₄ NW ¹ / ₄ , NW ¹ / ₄ SW ¹ / ₄ , W ¹ / ₂ NW ¹ / ₄ of Section 14, T. 17 N., R. 18 E.W.M.	PURPOSE(S) OF USE: Irrigation of 40 acres	IRRIGATION METHOD: Wheel Lines
NARRATIVE DESCRIPTION OF PROJECT: <p>The United States Bureau of Reclamation has proposed this project to create a sustainable rearing habitat in the upper portion of Fogarty Ditch. Water for the Payne property is diverted into "Greer Ditch" from the Yakima River via Fogarty Ditch. The Yakima River diversion structure that feeds water to Fogarty Ditch is a full span structure that has no screen to prevent entrainment of fish into the irrigation system and is not passable by juvenile fish. All other diversions on Fogarty Ditch have been properly screened. The last step is to move Mr. Payne's point of diversion to a point of withdrawal so Greer Ditch will no longer be needed. Mr. Payne currently pumps water from Greer Ditch at the point where the well location is proposed (see map below). It is believed the full description of the place of use was accidentally omitted from the authorized water right. The applicant has requested to include the NW¹/₄NW¹/₄ (approximately 1 acre) and the NW¹/₄SW¹/₄ (approximately 24 acres) to the existing place of use located within the SW¹/₄NW¹/₄ (approximately 15 acres) all located in Section 14, T. 17 N., R. 18 E.W.M. for a total of 40 acres irrigated to describe the correct and historical place of use.</p>
