NARRATIVE DESCRIPTION OF PROJECT:

The three water rights all presently share the same point of diversion on Cherry Creek, and the applicant proposes to move the point of diversion for all three rights to a common point that is up stream about 1300 feet. The current POD is considered to be a fish barrier, and will be demolished. Construction funding for the new POD was obtained by the KCCD through the SRFB. The new diversion will be screened and passable to fish. .
