CONSUMPTIVE USE CALCULATION: This is a downstream change in point of diversion. A consumptive use calculation is not required under RCW 90.03.380.
--

NARRATIVE DESCRIPTION OF PROJECT: The change being proposed is to move the two existing points of diversion to two new downstream points of diversion. The applicant owns adjacent property. In 2004/2005 the applicant moved all of its water rights (Teanaway River, Mason Creek and Musser Creek) to divert the water from a ring well in hydraulic continuity with the Teanaway River. In 2009/2010 the applicant added a second, direct pump point of diversion from the Teanaway River. Both of those transfers were approved by the WTWG. The applicant recently acquired this property and water right and seeks to move the Mason Creek water downstream to its two existing points of diversion on the Teanaway River.
