

WATER TRANSFER WORKING GROUP PROJECT DESCRIPTION

APPLICATION NO./COURT CLAIM NO.		
Water Budget Neutral Request No. G4-35571 with mitigation from Trust Water Right No. S4-02255(A)CTCL@2		
APPLICANT NAME	CONTACT NAME	TELEPHONE NO.
Erik & Laura Hanson	Kurt Walker - Ecology	509-454-4237
WATER RIGHT HOLDER'S NAME (if different)		EMAIL
Mitigation with SwiftWater Ranch LLC Trust Water Right		Kwal461@ecy.wa.gov

DATE OF APPLICATION	PRIORITY DATE
July 11, 2012	New use mitigated by trust water right with priority date of June 30, 1890

WATER SOURCE:	CROP:
well	Lawn or noncommercial garden
INSTANTANEOUS QUANTITY:	ANNUAL QUANTITY:
	0.414 acre-ft/yr
PERIOD OF USE:	
Continuous for single indoor domestic connection and irrigation season for lawn and garden	
PLACE OF USE:	PURPOSE OF USE:
Parcel No. 21396, located within the SE ¹ / ₄ NE ¹ / ₄ of Section 27, T. 20 N., R. 16 E.W.M.	Domestic use and Irrigation of 500 ft ² lawn or garden
IRRIGATION METHOD:	

CONSUMPTIVE USE CALCULATION:
<p>Indoor use: Two residential connections at 350 gallons per day (gpd) used continuously year round equates to 0392 ac-ft/yr of water use, or: $(350\text{gpd per connection}) \times (365 \text{ days}) \times (\text{one connection}) \times (1\text{ac-ft}/325,851\text{gal}) = 0.392 \text{ afy}$.</p> <p>Consistent with WAC 173-539A-050(3), 30% of domestic in-house use on a septic system is consumptively used, therefore: Indoor consumptive use = $(0.392 \text{ afy}) \times (0.30) = \mathbf{0.118 \text{ ac-ft/yr}}$</p> <p>Outdoor use: The requestor proposes to irrigate 500 ft² of lawn and garden. Using a crop irrigation requirement of 18.11 in/yr (or 1.51 ft/yr) for pasture/turf near Cle Elum from the Washington Irrigation Guide and an application efficiency of 80%, the total outdoor irrigation water use is 0.022 ac-ft/yr, or: $[(1.51 \text{ ft/yr}) \div 0.80] \times (500 \text{ ft}^2 \div 43,560 \text{ ft}^2/\text{ac}) = 0.022 \text{ ac-ft/yr}$ Consistent with WAC 173-539A-050(3), 90% of outdoor use is consumptively used, so: Outdoor consumptive use = $(0.022 \text{ ac-ft/yr}) \times (0.90) = \mathbf{0.019 \text{ ac-ft/yr}}$</p> <p>As a result consumptive use (CU) for the project totals to 0.137 ac-ft/yr (CU April 1 to Aug 31 is 0.065 ac-ft and CU Sept 1 to Mar 31 is 0.072 ac-ft)</p>

For detailed analysis of month-to-month uses see spreadsheet below.

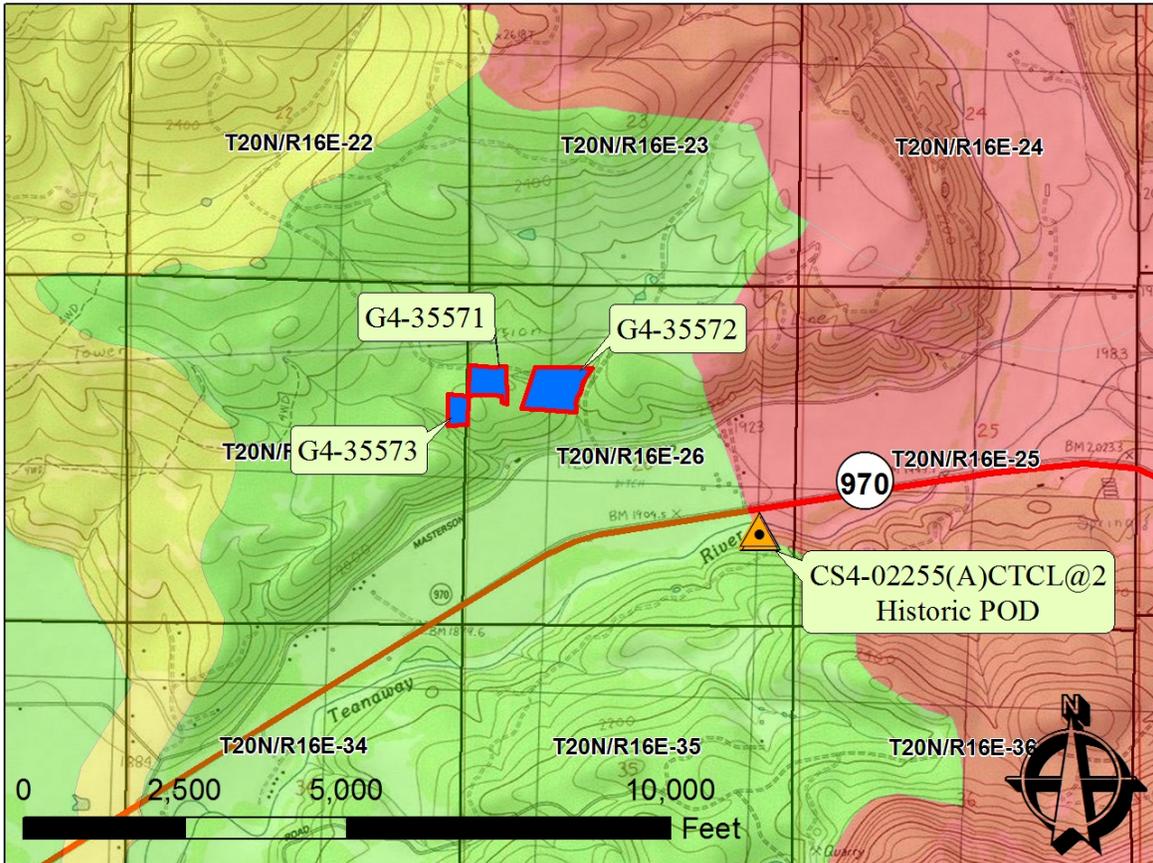

NARRATIVE DESCRIPTION OF PROJECT:

The requestor proposes to offset the 0.137 ac-ft/yr of consumptive use for the project (one residential connection and 500 ft² of lawn and garden) with 0.137 ac-ft/yr of mitigation water acquired from Trust Water Right No. S4-02255(A)CTCL@2. During the irrigation season, 0.017 ac-ft is assigned to the USBR-Ecology Exchange Contract (Contract No. 09XX101700) and released between September 15 and October 31 to address out of season impacts along the Yakima River.

The proposed well for the new use is to be located in an “green” area as noted on the SwiftWater Ranch LLC suitability map. Review of the local area hydrogeology suggests that the proposed groundwater withdrawals will impact the Teanaway River. For questions regarding the project area hydrogeology with respect to G4-35573, please contact Kurt Walker at (509) 454-4237, kwal461@ecy.wa.gov.
