

WATER TRANSFER WORKING GROUP PROJECT DESCRIPTION

APPLICATION NO./COURT CLAIM NO. S4-26927		
APPLICANT NAME Silver Cove Summer Home Association	CONTACT NAME Kelsey Collins	TELEPHONE NO. 509-575-2640
WATER RIGHT HOLDER'S NAME (if different) Silver Cove Summer Home Association		EMAIL KESI461@ECY.WA.GOV

DATE OF APPLICATION July 15, 1980	PRIORITY DATE July 15, 1980; mitigated by trust water right with June 30, 1873 priority date
--------------------------------------	---

WATER SOURCE: Unnamed spring(s), tributary to Rimrock Lake	CROP: N/A - Indoor Use Only
INSTANTANEOUS QUANTITY: 0.01 cfs	ANNUAL QUANTITY: 3.3 ac-ft/yr (total use); 1.0 ac-ft/yr (consumptive use)
PERIOD OF USE: Continuous – year round	
PLACE OF USE: Silver Cove Summer Home Association Lots 1 through 21 within Section 1, of Unsurveyed T. 13 N., R. 13 E.W.M., Snoqualmie National Forest	PURPOSE OF USE: Community domestic for 21 recreational cabins
IRRIGATION METHOD: N/A	

<p>CONSUMPTIVE USE CALCULATION:</p> <p>The applicant seeks authorization to divert a cumulative annual quantity of 3.3 acre-feet per year, as supported by metering records. Assuming 30 percent of the total authorized Q_a is consumptively used by indoor domestic use (on septic), the required mitigation is 1.0 ac-ft/yr.</p> <p>The community is located on National Forest System lands, authorized by a special use permit. The permit specifics lot appearance shall be maintained in the condition of a natural northwest forest environment. Planting of lawns or non-native plants is prohibited.</p>

<p>NARRATIVE DESCRIPTION OF PROJECT:</p> <p>As directed by Senate Bill 6861, Ecology is providing water banking opportunities for Yakima Basin Cabin Owners to purchase senior mitigation credits to offset the consumptive use of water.</p>

Ecology proposes to offset 1.0 ac-ft/yr of consumptive use with mitigation credits from Trust Water Right Nos. CS4-00195CTCL(A)sb6, CS4-00195CTCL(B)sb6, and CS4-00195CTCL(C)sb6 – collectively known as Bruton Ditch. The Bruton Ditch project was last presented to the WTWG on September 14, 2009.

Of the 60 ac-ft/yr currently assigned to the USBR-Ecology Exchange Contract (Contract No. 09XX101700) under the Bruton Ditch project, 1.0 ac-ft will be allocated to the subject application to address impacts to TWSA.

PROPOSED USBR-ECOLOGY CONTRACT ASSIGNMENT RATIONALE

Diversion of surface water will impact flows in the Yakima River when the TWSA irrigation supply period is in effect.

IMPACT ANALYSIS

The point of diversion is located at a small unnamed spring, approximately 2,000 feet above Rimrock Lake. Water is diverted from the improved spring, filtered, chlorinated, and stored prior to distribution to the cabins. Return flow to Rimrock Lake occurs through septic. Based on the authorized quantities, the cumulative consumptive impact will not exceed 1.0 ac-ft/yr.

Rimrock Lake is a migratory barrier to anadromous salmonids (Tieton Dam has no fish passage facilities). In addition, the small spring is not tributary to any surface water; therefore, is too small and/or steep to provide habitat for anadromous salmonids (Reclamation 2005), and WDFW fish distribution data indicate no occurrence of Bull Trout or other ESA-listed fish.

CONCLUSION

During rationing years, the availability of water to satisfy TWSA in the Yakima River will not be impacted if 1.0 ac-ft were held and released from Rimrock Lake. Assignment of 1.0 ac-ft would be in compliance with the consultation threshold in paragraph 18(b) of the USBR-Ecology contract.
