| CONSUMPTIVE USE CALCULATION: Consumptive use at the dairy was calculated to be 98%, and consumptive use at the winery is calculated to be 100%. To compensate for the increase in consumptive use associated with the change, the dairy's portion of the Qa will be reduced by 2% of the 20 acre feet transferred. This equates to a reduction in the Qa at the dairy from 136 afy to 135.6 afy. (2% of 20 afy = 0.4 afy). |
