NARRATIVE DESCRIPTION OF PROJECT:
The applicant is requesting to add a point of diversion currently confirmed under Court Claim No. 02203 (S4-84088-J), upstream on the Yakima River to a point of diversion currently confirmed under Court Claim No. 00704 (S4-84089-J). The new additional POD would be located approximately 250 – 300 feet upstream from the current POD.

The currently authorized POD is located:

875 feet north and 1915 feet west of the center of Section 24, being within Government Lot 5 of Section 24, T. 9 N., R. 25 E.W.M.

The proposed additional POD is located:

675 feet north and 2015 feet west of the center of Section 24, being within Government Lot 5 of Section 24, T. 9 N., R. 25 E.W.M.

The additional point of diversion is more efficient for the irrigation system given the river reach fluctuating flows, intake screening requirements, and river sand/debris accumulation that occur at the existing site.

Much of the proposed additional POD diversion structure will remain as is, and a mainline will be connected to the existing irrigation distribution system.

The remaining attributes of Court Claim 02203 including the existing place of use, instantaneous quantities, annual quantities, and period of use will remain unchanged.
