Section 2. STATEMENT OF INTENT

The project consists of one well and three separate parcels in Klickitat County.

02131450000400 2.02 acres (herein known as Lot 4)

02131450000500 7.70 acres (herein known as Lot 5) (Well on this lot)

02131450000600 2.05 acres (herein known as Lot 6)

The well is Well Log ID 302716 (Water Well Report included) although there is an error on it: the actual location of the well is SE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec 14 T 2 R13E not NE $\frac{1}{4}$ SE $\frac{1}{4}$.

The beneficial uses are:

A house and $\frac{1}{2}$ acre of existing grape drip irrigation on Lot 4.

A house and 6 $\frac{1}{2}$ acres of existing grape drip irrigation on Lot 5.

A house, tasting room and winery and $\frac{1}{2}$ acre of proposed grape drip irrigation on Lot 6.

This project should be approved because:

- 1) The beneficial use of providing domestic water for 3 houses is in the best interest of the public by providing the highest use of the ground water resource for housing. The beneficial use of drip irrigating vinifera grapes (for wine) is in the best interest of the public as it is the most judicious use of the ground water resource. High quality vinifera grapes can actually require deficit irrigation during the months of June through October. The industrial use of a winery and tasting room will provide direct economic benefit to the public through employment and wine taxation. All of these beneficial uses will raise the tax base of the county and state which is in the public interest.
- 2) There will be no impairment of existing rights as all existing users in the area have plenty of water.
- 3) Water is available for appropriation. During the last six years of irrigating the existing vineyard there has never been a decline in the static water level of the well. Further investigation will validate the adequacy of the ground water supply.
- 4) Not only will issuance of the requested water right not be detrimental to the public interest, it will be a great benefit to the public interest.
