Re: Phase 1 Proposal for Water Right Applications Nos. S4-35138 and S4-35153

Dear Mr. Schuppe:

We have reviewed the referenced Phase 1 Proposal and are pleased with Aspect Consulting's proposal. Please consider this letter our request to Ecology and Aspect Consulting to proceed with conducting Phase 1 work.

During the planning process that went into the application for the development of the fish rearing facility (Water Right Application No. S4-35138), the District determined we needed the requested 24 cfs from September 1 – June 1 only of each year. However, since submitting the application the District has had an opportunity to reflect on this request and realizes it would be in our best interest to ensure some flexibility in the timing of the fish rearing program. Therefore, we would like to amend our request for 24 cfs from September 1 – June 1 to year round. This will change the annual maximum quantity from 12,345 acre-feet per year (afy) to 17,387 afy. The remainder of the application remains unchanged. ←

We appreciate the opportunity to pursue processing of the water rights through this process and look forward to working closely with Ecology and Aspect to see these water rights come to fruition.

If you have any questions or need additional information, please do not hesitate to call.

Sincerely,
Licensing and Environmental Compliance

Waikele Hampton
