WATER RIGHT APPLICATION REVIEW

Application Number: S2-29668

Applicant: Triol Family Partnership
3616 26th Pl. W #1
Seattle, WA 98199

WRIA: 15

Water: Unnamed Spring trib to Hood Canal

This water and/or affected reaches downstream are inhabited by: coho, chum and cutthroat are found in stream #0438 (unnamed stream in question)

Based on: Site-specific observations WDFW database or GIS
 Literature Knowledge of this type of stream

Amount: 0.00 cfs 1.50 gpm 2.50 acre-ft/yr
Point of diversion: NW NW S33 T23 R3W
Point of use:

WDFW recommended conditions:

- Instream flows in WAC 173-5
- This water right should be subject to established lake levels, if any.

Instream flows based on: IFIM study USGS toe-width Tennant
 Other:

WDFW requests that water right be subject to the following instream flows or natural flow, whichever is less:

Instream flows to be measured at:

Other conditions requested by WDFW indicated by :

- HPA
- Screen intake if accessible to fish (to be determined during application for HPA) according to WDFW standards.
- Based upon review of fish resources present, type and amount of water use, condition of

habitat, and amount of water available, WDFW REQUESTS DENIAL of this application, in accordance with RCW 77.55.050, IF THIS SPACE IS CHECKED.

- WDFW recommends modification of this proposal to minimize impacts to fish.
- WDFW is a landowner and water user that will be affected by this proposed use.
- Please HOLD this application pending field review. WDFW staff will provide detailed response by
- Granting this water right application would adversely affect WDFW's existing water rights for a facility. We request the following conditions for this water right if it is granted.

Rationale for WDFW recommendations if not based on existing rules or statutes: WDFW recommends that one water right be issued to reflect that needed for domestic purposes only (either 29668 or 29669). Much money and effort has been spent restoring salmon runs and protecting water quality in the Dewatto area. Issuing a perpetual water right beyond that needed for maintenance of a house and existing cabins does not seem to be in the best public interest.

Additional Comments: The best case scenario is to convince the family to drill a well into an aquifer with sufficient water to meet their needs without impacting habitat.
