Dear Sir or Madame:

Re: Ground Water Application No. G 2-29319

Your application for the appropriation of water has been assigned the above referenced number. Please refer to this number in future correspondence.

Enclosed is a notice of your application which must be published once a week for two consecutive weeks in a qualified legal newspaper of general circulation in the County or Counties in which the storage, diversion, and use is to be made and in other newspapers as directed. A list of these newspapers in your county is enclosed. The applicant is responsible for the payment of the publication. Please read the notice carefully to make sure it is correct. Should you find an error, please return the notice to our office for correction.

You should mail or deliver the enclosed notice to a newspaper regarding publication as soon as possible. When you receive the affidavit of publication with the news clipping from the newspaper, please forward the original to this office promptly.

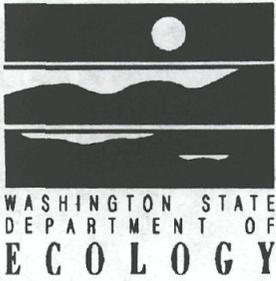

Since your application is for service of more than one residence, it is considered a public water supply. Public water supply systems are required to be approved by either the Local Health Department or the State Department of Health, depending upon system size. If you have not already done so, I suggest that you contact your Local Health Department or DOH, Drinking Water Section, Olympia, Washington, for further information.

Sincerely,

Sheri Carroll

Dear Water Right Applicant:

Re: Water Application No. G2-29319

We have received your application for a water right and it has been assigned the application number indicated above. Please refer to it by number in future correspondence.

Due to shortage of staff to meet the demand for service, new applications are being accepted and filed for future processing, but a public notice will not be sent at this time. Because we have approximately 5,000 pending applications for water rights, it may be some time before we can get to your application. When we begin processing your application, this office will prepare a public notice and send it to you with publication instructions. It is very important that you notify this office of any change of address or ownership of the property.

The Shorelands and Water Resources Program has conducted initial watershed assessments in 16 watersheds within the state. We will make decision on water right applications within these watersheds if we have sufficient information, along with acting on the oldest applications in each region.

Please keep in mind that filing an application for water use does not authorize use of the water. With the many complexities of water law, including issues like senior rights, fish habitat, and instream flows, favorable permit decisions are not always possible. We regret that a decision on your application cannot be made sooner and we strongly advise against investing further in your project until such time as a water right permit is issued.

If you still have questions, please call Deb Hunemuller at (360) 407-0283. To better manage limited staff time, we have set the following office hours:

Telephone Calls

Mondays and Wednesdays
8:00 am and 4:00 pm

Walk-Ins

Tuesdays and Thursdays
8:00 am to 12:00 (noon)

Our staff will respond to your questions and concerns as soon as possible. Thank you for your continued patience.

Sincerely,

Gale Blomstrom
Regional Supervisor
