Mining plan being prepared will involve recycling water from Pond for aggregate washing and sand preparation for commercial sales. Use will naturally increase as this relatively undeveloped area is put to proper use. In the event a large storage tank is needed we intend to install a 20-60 thousand gal. reservoir.

We have seven children, they may or may not want to build on our property. But domestic use may increase accordingly also.

Additional wells may be necessary at some later date to meet the needs of each private home.
