RE: Ground Water Permit No. G2-27071
Surface Water Permit No. S2-27070

Dear Ms. Peter,

I would like to request a 2-year extension on our Surface Water Permit (S2-27070) referenced above to coincide with our Ground Water Permit (G2-27071) to September 1, 2007. As we discussed during our phone conversation on October 14th our original intent in 2003 was to have these permits on parallel timing tracks for project management.

We have made substantial progress in development of the site in Mason County to utilize our water resources. The project received approval from Mason County, we have proceeded and completed site clearing with a 2000 square foot building with septic system. Current plans include a second and third twelve-inch well to be completed by the end of the year. This will complete the wells needed to fully extract and utilize our ground water.

Our schedule is then to development and install the surface water extraction point to coincide with piping being installed for the ground water lines in 2006. We are working with Washington Department of Fish and Wildlife personnel on this development, which included a site visit this past summer.

Please let me know if you have any questions or need further information.

Sincerely,

Greg Hudson
Vice President Production
