PROVISIONS

The intake shall be screened at all times in accordance with Department of Fish and Wildlife screening criteria. This water right is issued subject to Washington Department of Fish and Wildlife Hydraulic Project Approval.

This right shall issue subject to the development of a flow augmentation program for Friday Creek. Friday Creek's flow must be supplemented with Lake Samish water to ensure a flow of 2.0 cfs as measured downstream from the Nulle Road Bridge. Flow augmentation must start when the flow measured downstream from the Nulle Road Bridge drops below 2.0 cfs, as determined by the Department of Ecology.

The homeowner shall hook up to a public water system for domestic supply when available.

Non-essential uses of water authorized under the permit may be curtailed in extreme drought years.

The applicant is advised that the certificate will issue for only that quantity of water that has been diverted and applied to actual beneficial use. Such quantity applied to actual beneficial use shall not exceed the quantity specified in this permit, and will be calculated on the basis of the best information available to Ecology, including metering data and/or water duty analysis.

An approved metering device shall be installed and maintained in accordance with RCW 90.03.360, WAC 508-64-020 through -040 (installation, operation, and maintenance requirements). Meter readings shall be recorded at least monthly.

The right to use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, except as provided in RCW 90.03.380, 90.03.390, and 90.44.020.

This certificate of water right is specifically subject to relinquishment for non-use of water as provided in RCW 90.14.180.

Given under my hand and the seal of this office at Bellevue, Washington,
this 22nd day of DECEMBER, 2000.

Tom Fitzsimmons
Department of Ecology
