BEGINNING DATE	COMPLETION DATE	DATE COMPLETE APPLICATION OF WATER TO BE MADE
Started	Completed	February 1, 1977

PROVISIONS AND RECOMMENDATIONS

The water supply is to supply a 36 lot subdivision which will require about 1/2 acre-foot per lot.

This application may be approved for 240 gallons per minute continuously and 18 acre-feet per year for community domestic supply.

Applicant is advised that notice of proof of appropriation of water (under which final certificate of water right issues) should not be filed until the permanent diversion facilities have been installed together with a mainline system capable of delivering the recommended quantity of water to an existing or proposed distribution system within the area to be served.

Use of the waters to be appropriated under this application will be for a public water supply. State Board of Health rules require every owner of a public water supply to obtain written approval from the Water Supply and Waste Section, Health Services Div., PO Box 1788, Olympia 98504 prior to any new construction or alterations of a public water supply.

Additionally, the permit when issued shall carry the following provision: "Nothing in this permit shall be construed as excusing the permittee from compliance with any applicable federal, state, or local statutes, ordinances, or regulations including those administered by local agencies under the Shoreline Management Act of 1971."

"The installation of an access port as described in attached Ground Water Bulletin No. 1 shall be required prior to issuance of final certificate of water right. The applicant may, for his own convenience, wish to install an airline and gage in addition to the access port."

Signed at Olympia, Washington,
this 31 day of DEC., 1976.
